ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2013

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: **001-13387**

AeroCentury Corp.

(Exact name of Registrant as Specified in Its Charter)

Delaware

(State or Other Jurisdiction of Incorporation or Organization)

94-3263974

(IRS Employer Identification No.)

1440 Chapin Avenue, Suite 310

Burlingame, California 94010

(Address of Principal Executive Offices)

Registrant's telephone number, including area code: **(650) 340-1888**

Securities registered pursuant to Section 12(b) of the Act:

Title of each class

Name of each exchange on which registered

Common Stock, par value \$0.001 per share

NYSE MKT Exchange

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
 Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
 Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates (based upon the closing price as of June 30, 2013) was \$18,719,200.

The number of shares of the Registrant’s Common Stock outstanding as of March 12, 2014 was 1,543,257.

DOCUMENTS INCORPORATED BY REFERENCE

Part III of this Annual Report on Form 10-K incorporates information by reference from the Registrant’s Proxy Statement for its 2014 Annual Meeting of Stockholders. Except as expressly incorporated by reference, the Registrant’s Proxy Statement shall not be deemed to be a part of this Annual Report on Form 10-K.

PART I FINANCIAL INFORMATION

Forward-Looking Statements

This Annual Report on Form 10-K includes "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”) and Section 21E of the Securities Exchange Act of 1934, as amended (“the Exchange Act”). All statements in this Report other than statements of historical fact are "forward-looking statements" for purposes of these provisions, including any statements of plans and objectives for future operations and any statements of assumptions underlying any of the foregoing. Statements that include the use of terminology such as "may," "will," "expects," "plans," "anticipates," "estimates," "potential," or "continue," or the negative thereof, or other comparable terminology are forward-looking statements. Forward-looking statements include: (i) in Part I, Item 1, “*Business*,” the Company’s statements regarding its belief that the Company can purchase assets at an appropriate price and maintain an acceptable overall on-lease rate for them; that the Company is able and willing to enter into transactions with a wider range of lessees than would be possible for traditional, large lending institutions and leasing companies; that the Company expects it will have sufficient cash flow to cover expenses and provide excess cash flow; that the Company expects to have sufficient cash flow or borrowing availability under the Credit Facility to fund maintenance expenses; that competition may increase if competitors who have traditionally neglected the regional air carrier market begin to focus on that market; that the Company has a competitive advantage due to its experience and operational efficiency in financing the transaction sizes that are desired by many in the regional air carrier market; that the Company has a competitive advantage because JMC has developed a reputation as a global participant in the regional aircraft leasing market; (ii) in Part I, Item 3, “*Legal Proceedings*,” the Company’s anticipation that none of the current lessee collection and lessee vendor mechanic’s lien collection litigation, if resolved adverse to the Company would have a material adverse effect on the Company’s financial condition or results of operations; (iii) in Part II, Item 7, “*Management’s Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources*,” the Company’s statements regarding its belief that it will have adequate cash flow to fund operational needs and payments required under the Credit Facility and that this belief is based on reasonable assumptions; (iv) in Part II, Item 7, “*Management’s Discussion and Analysis of Financial Condition and Results of Operations — Outlook*,” the Company’s statements that there is an increased possibility that the Company’s current lessees will choose to return leased assets at lease expiration rather than renew the existing leases; that the Company will likely experience lower on-lease utilization rates, longer lead times, as well as lower rental rates for remarketed assets and that this will continue to affect the Company’s operating revenue through the remainder of 2014; that there will likely be a significant decrease in the pool of customers requiring aircraft; that the Company expects to lease two of the off-lease Fokker 100 aircraft during the second quarter of 2014; that the Company will likely incur substantial maintenance expense in late 2014 or early 2015 related to the return of one of the Dash 8-300 aircraft when the customer uses non-refundable maintenance reserves to meet the return conditions of the lease; that, given the current market for Dash-8-300 aircraft, the Company will be able to re-lease or sell the four returned Dash 8-400 aircraft in a timely manner; that available borrowings under the Credit Facility, considering possible lessee arrearages or off-lease periods, will be sufficient to meet its continuing obligations and to fund anticipated acquisitions; (v) in Part II, Item 7, “*Management’s Discussion and Analysis of Financial Condition and Results of Operations – Factors that May Affect Future Results*,” the Company’s statements regarding its belief that it will have sufficient cash funds to make any payment that arises due to any borrowing base limitations; that the Company intends to continue to

Forward-Looking Statements

This Annual Report on Form 10-K includes "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act") and Section 21E of the Securities Exchange Act of 1934, as amended ("the Exchange Act"). All statements in this Report other than statements of historical fact are "forward-looking statements" for purposes of these provisions, including any statements of plans and objectives for future operations and any statements of assumptions underlying any of the foregoing. Statements that include the use of terminology such as "may," "will," "expects," "plans," "anticipates," "estimates," "potential," or "continue," or the negative thereof, or other comparable terminology are forward-looking statements. Forward-looking statements include: (i) in Part I, Item 1, "*Business*," the Company's statements regarding its belief that the Company can purchase assets at an appropriate price and maintain an acceptable overall on-lease rate for them; that the Company is able and willing to enter into transactions with a wider range of lessees than would be possible for traditional, large lending institutions and leasing companies; that the Company expects it will have sufficient cash flow to cover expenses and provide excess cash flow; that the Company expects to have sufficient cash flow or borrowing availability under the Credit Facility to fund maintenance expenses; that competition may increase if competitors who have traditionally neglected the regional air carrier market begin to focus on that market; that the Company has a competitive advantage due to its experience and operational efficiency in financing the transaction sizes that are desired by many in the regional air carrier market; that the Company has a competitive advantage because JMC has developed a reputation as a global participant in the regional aircraft leasing market; (ii) in Part I, Item 3, "*Legal Proceedings*," the Company's anticipation that none of the current lessee collection and lessee vendor mechanic's lien collection litigation, if resolved adverse to the Company would have a material adverse effect on the Company's financial condition or results of operations; (iii) in Part II, Item 7, "*Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources*," the Company's statements regarding its belief that it will have adequate cash flow to fund operational needs and payments required under the Credit Facility and that this belief is based on reasonable assumptions; (iv) in Part II, Item 7, "*Management's Discussion and Analysis of Financial Condition and Results of Operations — Outlook*," the Company's statements that there is an increased possibility that the Company's current lessees will choose to return leased assets at lease expiration rather than renew the existing leases; that the Company will likely experience lower on-lease utilization rates, longer lead times, as well as lower rental rates for remarketed assets and that this will continue to affect the Company's operating revenue through the remainder of 2014; that there will likely be a significant decrease in the pool of customers requiring aircraft; that the Company expects to lease two of the off-lease Fokker 100 aircraft during the second quarter of 2014; that the Company will likely incur substantial maintenance expense in late 2014 or early 2015 related to the return of one of the Dash 8-300 aircraft when the customer uses non-refundable maintenance reserves to meet the return conditions of the lease; that, given the current market for Dash-8-300 aircraft, the Company will be able to re-lease or sell the four returned Dash 8-400 aircraft in a timely manner; that available borrowings under the Credit Facility, considering possible lessee arrearages or off-lease periods, will be sufficient to meet its continuing obligations and to fund anticipated acquisitions; (v) in Part II, Item 7, "*Management's Discussion and Analysis of Financial Condition and Results of Operations – Factors that May Affect Future Results*," the Company's statements regarding its belief that it will have sufficient cash funds to make any payment that arises due to any borrowing base limitations; that the Company intends to continue to focus solely on regional aircraft and engines; that the overall industry experience of JMC's personnel and its technical resources should permit the Company to effectively manage new aircraft types and engines; that there are effective mitigating factors against undue compensation-incented risk-taking by JMC; that the burden and costs of complying with government regulations will fall on the operators of equipment and not the Company, and that future government regulations could cause the value of any non-complying equipment owned by the Company to decline substantially; that it is not expected that the costs of complying with current environmental regulations will have a material adverse effect on the Company; that the Company has sufficient cyber-security measures in place commensurate with the risks to the Company of a successful cyber-attack or breach of security; and that the Company believes that sufficient replacement mechanisms exist in the event of an interruption in its internet communications ability.

These forward-looking statements involve risks and uncertainties, and it is important to note that the Company's actual results could differ materially from those projected or assumed in such forward-looking statements. Among the factors that could cause actual results to differ materially are the factors detailed under the heading "*Management's Discussion and Analysis of Financial Condition and Results of Operations -- Factors That May Affect Future Results*," which include the risk of non-compliance of the Company's lessees with obligations under their respective leases; risk of unanticipated events that cause a lowered demand for air travel; risks related to use of debt financing for acquisitions; risk of failure to timely sell or re-lease off-lease assets; risk of unanticipated bankruptcy or failure of one or more of the Company's lessees; risk of non-compliance with credit facility covenants; risk of unavailability of additional debt financing; risk of rapidly increasing interest rates; and future trends and results which cannot be predicted with certainty. The cautionary statements made in this Report should be read as being applicable to all related forward-looking statements wherever they appear herein. All forward-looking statements and risk factors included in this document are made as of the date hereof, based on information available to the Company as of the date hereof, and the Company assumes no obligation to update any forward-looking statement or risk factor. You should consult the risk factors listed from time to time in the Company's filings with the Securities and Exchange Commission.

Item 1. Business.*Business of the Company*

AeroCentury Corp., a Delaware corporation incorporated in 1997 (the "Company"), acquires used regional aircraft and aircraft engines for lease to regional carriers worldwide.

The business of the Company is managed by JetFleet Management Corp. ("JMC"), pursuant to a management agreement (the "Management Agreement") with JMC. JMC is an integrated aircraft management, marketing and financing business and a subsidiary of JetFleet Holding Corp. ("JHC"). Certain officers of the Company are also officers of JHC and JMC and hold significant ownership positions in both JHC and the Company.

Since its formation, the Company has been engaged in the business of investing in used regional aircraft equipment leased to foreign and domestic regional air carriers. The Company's principal business objective is to increase stockholder value by acquiring aircraft assets and managing those assets in order to provide a return on investment through lease revenue and, eventually, sale proceeds. The Company strives to achieve its business objective by reinvesting cash flow and using short-term and long-term debt and/or equity financing.

The Company's success in achieving its objective depends in large part on its success in three areas: asset selection, lessee selection and obtaining financing for acquisition of aircraft and engines.

The Company typically acquires assets in one of three ways. The Company may purchase an asset already subject to a lease and assume the rights and obligations of the seller, as lessor under the existing lease. Additionally, the Company may purchase an asset from an air carrier and lease it back to the seller. Finally, the Company may purchase an asset from a seller and then immediately enter into a new lease for the aircraft with a third party lessee. In this last case, the Company typically does not purchase an asset unless a potential lessee has been identified and has committed to lease the asset. Occasionally, the Company may also acquire an asset for which it does not have a potential lessee.

Although the Company has generally targeted used regional aircraft and engines with purchase prices between \$3 million and \$10 million, and lease terms less than five years, in late 2013 and early 2014, the Company acquired four regional jets with purchase prices and lease terms exceeding those of previously-acquired aircraft. In determining assets for acquisition, the Company evaluates, among other things, the type of asset, its current price and projected future value, its versatility or specialized uses, the current and projected availability of and demand for that asset, and the type and number of future potential lessees. Because JMC has extensive experience in purchasing, leasing and selling used regional aircraft, the Company believes it can purchase these assets at an appropriate price and maintain an acceptable overall on-lease rate for the Company's assets.

In order to improve the remarketability of an aircraft after expiration of the lease, the Company's leases generally contain provisions that require that when the lessee returns the aircraft, the Company receives the aircraft in a condition that allows the Company to expediently re-lease or sell the aircraft, or to receive sufficient payments based on usage over the lease term to cover any maintenance or overhaul of the aircraft required to bring the aircraft to such a state.

When considering whether to accept transactions with a lessee, the Company examines the lessee's creditworthiness, growth prospects, financial status and backing; the experience of its management; and the impact of legal and regulatory matters in the lessee's market, all of which are weighed in determining the deal terms offered to the lessee. In addition, it is the Company's policy to monitor the lessee's business and financial performance closely throughout the term of the lease, and if requested, provide assistance drawn from the experience of the Company's management in many areas of the air carrier industry. Because of its "hands-on" approach to portfolio management, the Company believes it is able and willing to enter into transactions with a wider range of lessees than would be possible for traditional, large lending institutions and leasing companies.

The Company has funded its asset acquisitions primarily through debt financing supplemented by free cash flow. The Company's primary source of debt financing has been a secured credit facility. The Company's current credit facility ("Credit Facility") is provided by a syndicate of banks, with Union Bank, N.A. as agent, and in March 2013, the term expiration date was extended to September 30, 2015.

Working Capital Needs

The Company's portfolio of assets has historically generated revenues that have exceeded the Company's cash expenses, which consist mainly of management fees, maintenance expenses, principal and interest payments on debt, professional fees, and insurance premiums.

The Company's management fees payable to JMC are based upon the size of the Company's asset pool. Maintenance costs for off-lease aircraft and maintenance costs for on-lease aircraft that are funded out of non-refundable maintenance reserves payments received from lessees are recognized as expenses as incurred. Interest expense is dependent on both the balance of the Company's indebtedness and applicable interest rates. Professional fees

Item 1. Business.

Business of the Company

AeroCentury Corp., a Delaware corporation incorporated in 1997 (the "Company"), acquires used regional aircraft and aircraft engines for lease to regional carriers worldwide.

The business of the Company is managed by JetFleet Management Corp. ("JMC"), pursuant to a management agreement (the "Management Agreement") with JMC. JMC is an integrated aircraft management, marketing and financing business and a subsidiary of JetFleet Holding Corp. ("JHC"). Certain officers of the Company are also officers of JHC and JMC and hold significant ownership positions in both JHC and the Company.

Since its formation, the Company has been engaged in the business of investing in used regional aircraft equipment leased to foreign and domestic regional air carriers. The Company's principal business objective is to increase stockholder value by acquiring aircraft assets and managing those assets in order to provide a return on investment through lease revenue and, eventually, sale proceeds. The Company strives to achieve its business objective by reinvesting cash flow and using short-term and long-term debt and/or equity financing.

The Company's success in achieving its objective depends in large part on its success in three areas: asset selection, lessee selection and obtaining financing for acquisition of aircraft and engines.

The Company typically acquires assets in one of three ways. The Company may purchase an asset already subject to a lease and assume the rights and obligations of the seller, as lessor under the existing lease. Additionally, the Company may purchase an asset from an air carrier and lease it back to the seller. Finally, the Company may purchase an asset from a seller and then immediately enter into a new lease for the aircraft with a third party lessee. In this last case, the Company typically does not purchase an asset unless a potential lessee has been identified and has committed to lease the asset. Occasionally, the Company may also acquire an asset for which it does not have a potential lessee.

Although the Company has generally targeted used regional aircraft and engines with purchase prices between \$3 million and \$10 million, and lease terms less than five years, in late 2013 and early 2014, the Company acquired four regional jets with purchase prices and lease terms exceeding those of previously-acquired aircraft. In determining assets for acquisition, the Company evaluates, among other things, the type of asset, its current price and projected future value, its versatility or specialized uses, the current and projected availability of and demand for that asset, and the type and number of future potential lessees. Because JMC has extensive experience in purchasing, leasing and selling used regional aircraft, the Company believes it can purchase these assets at an appropriate price and maintain an acceptable overall on-lease rate for the Company's assets.

In order to improve the remarketability of an aircraft after expiration of the lease, the Company's leases generally contain provisions that require that when the lessee returns the aircraft, the Company receives the aircraft in a condition that allows the Company to expediently re-lease or sell the aircraft, or to receive sufficient payments based on usage over the lease term to cover any maintenance or overhaul of the aircraft required to bring the aircraft to such a state.

When considering whether to accept transactions with a lessee, the Company examines the lessee's creditworthiness, growth prospects, financial status and backing; the experience of its management; and the impact of legal and regulatory matters in the lessee's market, all of which are weighed in determining the deal terms offered to the lessee. In addition, it is the Company's policy to monitor the lessee's business and financial performance closely throughout the term of the lease, and if requested, provide assistance drawn from the experience of the Company's management in many areas of the air carrier industry. Because of its "hands-on" approach to portfolio management, the Company believes it is able and willing to enter into transactions with a wider range of lessees than would be possible for traditional, large lending institutions and leasing companies.

The Company has funded its asset acquisitions primarily through debt financing supplemented by free cash flow. The Company's primary source of debt financing has been a secured credit facility. The Company's current credit facility ("Credit Facility") is provided by a syndicate of banks, with Union Bank, N.A. as agent, and in March 2013, the term expiration date was extended to September 30, 2015.

Working Capital Needs

The Company's portfolio of assets has historically generated revenues that have exceeded the Company's cash expenses, which consist mainly of management fees, maintenance expenses, principal and interest payments on debt, professional fees, and insurance premiums.

The Company's management fees payable to JMC are based upon the size of the Company's asset pool. Maintenance costs for off-lease aircraft and maintenance costs for on-lease aircraft that are funded out of non-refundable maintenance reserves payments received from lessees are recognized as expenses as incurred. Interest expense is dependent on both the balance of the Company's indebtedness and applicable interest rates. Professional fees are paid to third parties for expenses not covered by JMC under the Management Agreement. Insurance expense includes amounts paid for directors

and officers insurance, as well as product liability insurance and aircraft hull insurance for periods when an aircraft is off lease.

So long as the Company succeeds in keeping the majority of its assets on lease and interest rates do not rise significantly and rapidly, the Company's cash flow should continue to be sufficient to cover these expenses and provide excess cash flow. If the Company incurs unusually large maintenance expense in any given period, the Company expects it will have sufficient cash flow, or borrowing availability under its credit facility, to fund such maintenance.

Competition

The Company competes with other leasing companies, banks, financial institutions, and aircraft leasing partnerships for customers that generally are regional commercial aircraft operators seeking to lease aircraft under operating leases. Management believes that competition may increase if competitors who have traditionally neglected the regional air carrier market begin to focus on that market. Because competition is largely based on price and lease terms, the entry of new competitors into the market, and/or traditional large aircraft lessors into the regional aircraft niche, particularly those with greater access to capital markets than the Company, could lead to fewer acquisition opportunities for the Company and/or lease terms less favorable to the Company on acquisitions, as well as fewer renewals of existing leases or new leases of existing aircraft, all of which could lead to lower revenues for the Company.

The Company, however, believes that it has a competitive advantage due to its experience and operational efficiency in financing the transaction sizes that are desired by many in the regional air carrier market. Management believes that the Company also has a competitive advantage because JMC has developed a presence as a global participant in the regional aircraft leasing market.

Dependence on Significant Customers

For the year ended December 31, 2013, the Company's four largest customers accounted for 23%, 19%, 11% and 10% of lease revenue. Concentration of credit risk with respect to lease receivables will diminish in the future only if the Company is able to re-lease assets currently on lease to significant customers to new customers and/or acquire assets for lease to new customers.

Environmental Matters

Neither compliance with federal, state and local provisions regulating discharge of greenhouse gas emissions (including carbon dioxide (CO₂)) in the environment and/or aircraft noise regulations, nor remedial agreements or other actions relating to the environment, has had, or is expected to have, a material effect on the Company's capital expenditures, financial condition, results of operations or competitive position.

Employees

Under the Company's Management Agreement with JMC, JMC is responsible for all administration and management of the Company. Consequently, the Company does not have any employees.

Available Information

The headquarters of AeroCentury Corp. is located at 1440 Chapin Avenue, Suite 310, Burlingame, California 94010. The main telephone number is (650) 340-1888. The Company's website is located at: <http://www.aerocentury.com>.

The Company is subject to the reporting requirements of the Securities Exchange Act (the "Exchange Act"). Therefore, the Company files periodic reports, proxy statements and other information with the Securities and Exchange Commission (the "SEC"). Copies of these materials, filed by us with the SEC, are available free of charge on our website at www.aerocentury.com through the Investor Relations link (SEC Filings). The public may read and copy any materials the Company files with the SEC at the SEC's Public Reference Room of the SEC at 100 F Street N.E., Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an Internet site (<http://www.sec.gov>) that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC.

Item 1A. Risk Factors.

Smaller reporting companies are not required to provide this information.

Employees

Under the Company's Management Agreement with JMC, JMC is responsible for all administration and management of the Company. Consequently, the Company does not have any employees.

Item 1A. Risk Factors.

Smaller reporting companies are not required to provide this information.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

As of December 31, 2013, the Company did not own or lease any real property, plant or materially important physical properties. The Company maintains its principal office at 1440 Chapin Avenue, Suite 310, Burlingame, California 94010. However, since the Company has no employees and the Company's portfolio of leased aircraft assets is managed and administered under the terms of the Management Agreement with JMC, all office facilities are provided by JMC.

For information regarding the aircraft and aircraft engines owned by the Company, refer to Note 2 to the Company's financial statements in Item 8 of this Annual Report on Form 10-K.

Item 3. Legal Proceedings.

The Company from time to time engages in ordinary course litigation relating to lease collection matters against defaulting lessees and mechanic's lien claims by vendors hired by lessees. None of the current litigation, if resolved adverse to the Company, is anticipated to have a material adverse effect on the Company's financial condition or results of operations.

Item 4. Mine Safety Disclosures.

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

The shares of the Company's Common Stock are traded on the NYSE MKT exchange ("NYSE MKT") under the symbol "ACY."

Market Information

The Company's Common Stock has been traded on the NYSE MKT since January 16, 1998. The following table sets forth the high and low sales prices reported on the NYSE MKT for the Company's Common Stock for the periods indicated:

Period	High	Low
Fiscal year ended December 31, 2013:		
Fourth Quarter	\$ 20.60	\$ 14.65
Third Quarter	22.30	19.10
Second Quarter	21.50	17.53
First Quarter	18.31	14.20
Fiscal year ended December 31, 2012:		
Fourth Quarter	14.10	11.35
Third Quarter	12.95	9.95
Second Quarter	15.60	10.32
First Quarter	11.90	6.00

On March 10, 2014, the closing sale price of the Company's Common Stock on the NYSE MKT exchange was \$17.79 per share.

Number of Security Holders

According to the Company's transfer agent, the Company had approximately 1,700 stockholders of record as of March 10, 2014. Because brokers and other institutions on behalf of beneficial stockholders hold many of the Company's shares of Common Stock, the Company is unable to estimate the total number of beneficial stockholders represented by those record holders.

Dividends

No dividends have been declared or paid to date. The Company has no plans at this time to declare or pay dividends, and intends to re-invest any earnings into the acquisition of additional revenue-generating aircraft equipment.

The terms of the Credit Facility prohibit the Company from declaring or paying dividends on its Common Stock, except for cash dividends in an aggregate annual amount not to exceed 50% of the Company's net income in the immediately preceding fiscal year so long as immediately prior to and immediately following such dividend the Company is not in default under the Credit Facility.

Stockholder Rights Plan

For information regarding the Company's stockholder rights plan, refer to Note 7 to the Company's financial statements in Item 8 of this Annual Report on Form 10-K.

Item 6. Selected Financial Data.

Item 6. Selected Financial Data.

This report does not include information described under Item 301 of Regulation S-K pursuant to the rules of the SEC that permit “smaller reporting companies” to omit such information.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations.*Overview*

The Company owns regional aircraft and engines, which are typically leased to customers under triple net leases with terms that are less than the useful life of the assets. A “triple net operating lease” is an operating lease under which, in addition to monthly rental payments, the lessee is generally responsible for the taxes, insurance and maintenance and repair of the aircraft arising from the use and operation of the aircraft during the term of the lease. The acquisition of such equipment is generally made using debt financing. The Company’s profitability and cash flow are dependent in large part upon its ability to acquire equipment, obtain and maintain favorable lease rates on such equipment, and re-lease or sell equipment that comes off lease. The Company is subject to the credit risk of its lessees, both as to collection of rental payments and as to performance by lessees of their obligations to maintain the equipment. Since lease rates for assets in the Company’s portfolio generally decline as assets age, the Company’s ability to maintain and grow revenue and earnings is primarily dependent upon the Company’s ability to acquire and lease additional assets.

The Company’s primary uses of cash are for purchases of aircraft and engines, maintenance expense, debt service payments, management fees, insurance and professional fees.

The Company’s most significant non-cash expenses include aircraft and engine depreciation, amortization of costs associated with the Company’s indebtedness, which is included in interest expense, and, in some years, impairment provisions, which are affected by significant estimates.

Critical Accounting Policies, Judgments and Estimates

The Company’s discussion and analysis of its financial condition and results of operations are based upon the financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses, and the related disclosure of contingent assets and liabilities at the date of the financial statements. In the event that actual results differ from these estimates or the Company adjusts these estimates in future periods, the Company’s operating results and financial position could be materially affected. For a discussion of Critical Accounting Policies, Judgments and Estimates, refer to Note 1 to the Company’s financial statements in Item 8 of this Annual Report on Form 10-K.

Maintenance Reserves

Maintenance reserves are determined by mutual agreement of the Company and its lessee at inception of the lease and are based on the Company’s estimate of the total maintenance cost at some future point resulting from the lessee’s usage. Reserve rates are typically subject to an annual adjustment provision that accounts for inflation of maintenance costs. If a lessee is required to repair a component during the lease or perform a repair at lease end in order to comply with aircraft return conditions, it will be entitled to collect the reserves related to that repair from the Company, and any excess costs would then be the responsibility of the lessee. Therefore, if maintenance rates do not accurately reflect the true cost of a repair, the Company will not incur any financial impact. If, however, the Company repossesses an aircraft upon a lessee default, and the maintenance reserves collected under that defaulted lease are less than the actual maintenance costs, the Company is responsible for such excess costs. It is also possible that, in order to remarket a repossessed aircraft, certain inspections and repairs may need to be performed earlier than otherwise required by the manufacturer or regulatory specifications. In such a case, the collected reserves from the defaulted lessee, which were established assuming a normal interval between repairs, would likely be insufficient to cover the total cost incurred by the Company. For a discussion of the Company’s accounting policies regarding Maintenance Reserves, refer to Note 3 to the Company’s financial statements in Item 8 of this Annual Report on Form 10-K.

Results of Operations

The Company recorded net income of \$3.2 million in 2013 compared to net income of \$5.2 million in 2012.

Annual operating lease revenue decreased 21% from \$23.7 million in 2012 to \$18.8 million in 2013, primarily reflecting lower portfolio utilization and lower revenue received from those lessees from which the Company records revenue only on cash receipt as a result of substantial uncertainty of collectability. The effects of these decreases were partially offset by increases in operating lease revenue from assets purchased during 2012 and 2013.

The average net book value of assets held for lease during 2013 and 2012 was approximately \$143.2 million and \$138.6 million, respectively, representing an increase of 3%. The average portfolio utilization during 2013 and 2012 was 76% and 84%, respectively.

Maintenance reserves revenue for the year ended December 31, 2013 increased 117% to \$8.9 million from \$4.1 million in 2012. The increase was principally due to the recognition of \$6.5 million maintenance reserves revenue in 2013 for funds received upon assignment of two leases in 2012 from one lessee to a second lessee, as described in Note 3 to the Company's financial statements in Item 8 of this Annual Report on Form 10-K. The effect of this increase was partially offset by decreases resulting from lower portfolio utilization and lower revenue received from those lessees from which the Company records revenue only on cash receipt as a result of substantial uncertainty of collectability in 2013 than in 2012.

During 2013, the Company recorded net gains totaling \$3.7 million related to the sale of five aircraft and an engine, as well as the disposal of a Tay 650-15 engine. During 2012, the Company recorded gains totaling \$1.4 million related to the sale of two aircraft and an engine. The Company also leased an engine pursuant to a finance lease in each of 2012 and 2013 and recorded related gains of \$0.1 million in each of those years.

During 2013, the Company recorded \$0.5 million of other income related to retention of a lessee's security deposits upon early termination of two leases following its bankruptcy in January 2013.

The Company's maintenance expense increased 115% to \$8.8 million in 2013 from \$4.1 million in 2012, as a result of increases in maintenance performed by lessees using non-refundable reserves and maintenance performed by the Company on off-lease aircraft. During 2013 and 2012, previously-collected non-refundable maintenance reserves, which had been recorded as revenue when earned, funded \$4.8 million and \$1.8 million, respectively, of the Company's maintenance expense in those years.

During 2013 and 2012, the Company added equipment to the lease portfolio of approximately \$24.7 million and \$30.5 million, respectively. The Company sold equipment with a book value of approximately \$8.7 million and \$4.9 million during 2013 and 2012, respectively. Depreciation and management fees in 2013 increased by 19% and 4%, respectively, over the previous year, primarily as a result of acquisitions and changes in residual assumptions from year to year.

The Company's interest expense decreased by 12%, from \$4.6 million in 2012 to \$4.1 million in 2013, primarily as a result of a lower average Credit Facility balance and lower amortization of Credit Facility fees in 2013.

The Company's insurance expense increased 35%, from \$0.9 million in 2012 to \$1.2 million in 2013, primarily due to aircraft that were on lease in 2012 but off lease in 2013.

Liquidity and Capital Resources

The Company is currently financing its assets primarily through debt financing and excess cash flows.

(a) Credit Facility

In March 2013, the Company's Credit Facility was increased to \$130 million and extended to September 30, 2015. The Credit Facility is secured by all of the assets of the Company, including its aircraft and engine portfolio.

In November 2013, the Company obtained a waiver of compliance with a lessee concentration covenant under its Credit Facility agreement at the September 30, 2013 and December 31, 2013 calculation dates. This covenant is intended to monitor the concentration of recognized lease revenue attributable to the Company's largest lessees, as measured against the total recognized lease revenue from all lessees. The non-compliance resulted primarily from the Company's decision to recognize lease revenues from certain lessees from whom collectability was deemed not reasonably assured on a cash basis rather than an accrual basis (as is normally done for the Company's lessees), thereby reducing the rent attributable to those lessees and the Company's total lease revenue. As a result, lease revenue attributable to other lessees exceeded the percentage permitted in the covenant. The Company was in compliance with all other covenants under the Credit Facility agreement at December 31, 2013, and was in compliance with all covenants at December 31, 2012.

There can be no assurance that the Company will be in compliance with this covenant or any of the other covenants under the Credit Facility through its term, and in the event of any failure to be in compliance, the Company will need to seek additional waivers or amendment of applicable covenants from its lenders if such compliance failure is not timely cured. Any default under the Credit Facility, if not cured within the time permitted under the facility or waived by the lenders, could result in foreclosure upon any or all of the assets of the Company.

The Company's interest expense generally increases and decreases with prevailing interest rates. The Company has the ability to enter into interest rate swaps to economically hedge against interest rate increases in its floating rate debt under the Credit Facility and has done so in the past.

For additional information regarding the Company's credit facility, refer to Note 6 to the Company's financial statements in Item 8 of this Annual Report on Form 10-K.

(b) Cash flow

The Company's primary sources of cash are (i) rent payments due under the Company's operating and finance leases and (ii) refundable and non-refundable maintenance reserves billed monthly to lessees based on asset usage. The Company's leases do not require that cash collected by the Company for maintenance reserves and security deposits be segregated and, therefore, such cash is included in cash and cash equivalents on the Company's balance sheets.

The Company's primary uses of cash are for purchase of aircraft and engines, maintenance expense, management fees, professional fees, insurance, and Credit Facility interest and principal payments. The amount of interest paid by the Company depends on the outstanding balance of its Credit Facility, which carries a floating interest rate as well as an interest rate margin, and is therefore also dependent on changes in prevailing interest rates.

The timing and amount of the Company's payments for maintenance vary, depending on the timing of lessee-performed maintenance that is eligible for reimbursement, the aggregate amount of such claims and the timing and amount of maintenance incurred in connection with preparation of off-lease assets for re-lease to new customers. The Company's maintenance payments typically constitute a large portion of its cash needs, and the Company may from time to time borrow additional funds under the Credit Facility to provide funding for such payments.

Management believes that the Company will have adequate cash flow to meet its ongoing operational needs, including any required repayments under the Credit Facility due to borrowing base limitations, based upon its estimates of future revenues and expenditures, which include assumptions regarding (i) revenues for assets to be re-leased, (ii) required debt payments, (iii) interest rates, (iv) the cost and anticipated timing of maintenance to be performed and (v) timely use of proceeds of unused debt capacity toward additional acquisitions of income producing assets.

Although the Company believes that the assumptions it has made in forecasting its cash flow are reasonable in light of experience, actual results could deviate from such assumptions. Among the more significant factors that could have an impact on the accuracy of cash flow assumptions are (i) lessee non-compliance with lease obligations, (ii) inability to locate new lessees for returned equipment within a reasonable remarketing period, or at a rent level consistent with projected rates for the asset, (iii) lessee performance of maintenance, and payment of related maintenance claims, earlier than anticipated, (iv) inability to locate and acquire a sufficient volume of additional assets at prices that will produce acceptable net returns, (v) increases in interest rates, (vi) inability to timely dispose of off-lease assets at prices commensurate with their market value, and (vii) any one or a combination of the above factors that causes the Company to violate covenants under the Credit Facility agreement, which may in turn require repayment of some or all of the amounts outstanding.

(i) Operating activities

The Company's cash flow from operations decreased by \$18.0 million in 2013 compared to 2012. As discussed below, the change in cash flow was primarily a result of decreases in payments received for operating lease revenue and maintenance reserves and an increase in payments for maintenance.

Payments for operating lease revenue and maintenance reserves

Payments received from lessees for rent decreased by \$5.4 million in 2013 compared to 2012, primarily due to an increase in the number of off-lease assets and payment delinquencies in the 2013 period. Payments received for maintenance reserves decreased by \$7.6 million in 2013 compared to 2012. Cash received for maintenance reserves revenue in 2012 included a \$6.5 million payment from assignment of two leases from one lessee to a second lessee, as described in Note 3 to the Company's financial statements in Item 8 of this Annual Report on Form 10-K. In addition, the Company received less cash related to maintenance reserves revenue in 2013 as a result of payment delinquencies and assets that were on lease in 2012, but off lease in 2013.

The Company is receiving no lease revenue for its assets that are currently off lease, which assets are comprised of four Fokker 50 aircraft, one Saab 340B aircraft, six Fokker 100 aircraft, one General Electric CF34-8E engine, and one Tay 650-15 engine. The Tay 650-15 engine, which was acquired during the first quarter of 2013, is being held as a spare and used in connection with required maintenance on the Company's Fokker 100 aircraft.

Payments for maintenance

Payments for maintenance increased by \$2.8 million in 2013 compared to 2012, primarily as a result of an increase in maintenance costs for off-lease aircraft. The amount of payments for maintenance in future periods will depend on the amount and timing of maintenance paid as reimbursement to lessees for maintenance reserves claims, which are dependent upon utilization and required maintenance intervals, and maintenance paid for off-lease assets.

(ii) Investing activities

During 2013 and 2012, the Company received cash of \$11.0 million and \$5.3 million, respectively, from the sale of assets. During the same time periods, the Company used cash of \$25.0 million and \$30.6 million, respectively, for purchases and capital improvement of aircraft.

(iii) Financing activities

The Company borrowed \$19.0 million and \$19.9 million under the Credit Facility during 2013 and 2012, respectively. In these same time periods, the Company repaid \$9.3 million and \$17.3 million, respectively, of its total outstanding debt under the Credit Facility. Such repayments were funded by excess cash flow. During 2013 and 2012, the Company paid \$2.1 million and \$1.6 million of fees related to the extension of the Company's Credit Facility. Such fees are amortized over the term of the Credit Facility.

- 6 -

*Outlook**(a) General*

The slow recovery from the global downturn has resulted in a significant reduction in airline passenger volume and, in reaction to that, a reduction in the number of aircraft and aircraft engines needed for operation by carriers in nearly all geographic areas, especially Europe. This presents a challenging environment for the Company in three respects:

- There is an increased possibility of an unanticipated lessee default, as evidenced by the bankruptcies of two of the Company's customers in each of 2012 and 2013. A lessee's default and the unscheduled return of an asset to the Company for remarketing could result not only in reduced operating lease revenue but also in unanticipated, unrecoverable expenses arising from the lessee's default on its maintenance and return condition obligations. The Company monitors the performance of all of its customers and has noted that several of the Company's customers have experienced weakened operating results and have not yet achieved financial stability.
- There is an increased possibility that the Company's current lessees will choose to return leased assets at lease expiration rather than renew the existing leases, notwithstanding that any such lessee may incur significant expenses to satisfy return conditions. Due to decreased demand for aircraft capacity, it is likely that the Company will experience lower on-lease utilization rates and longer lead times for remarketing of returned assets, as well as lower rental rates for remarketed assets, as was the case with several lease extensions and re-leases since 2011. This trend is expected to continue to affect the Company's operating revenue through 2014.
- Finally, in the current environment of diminished demand for leisure and business air travel and consequently reduced capacity by carriers, there is likely to be a significant decrease in the pool of customers requiring aircraft. Any decrease in the pool of customers requiring aircraft could increase the Company's reliance on a small number of lessees, which increases the Company's risk of financial covenant compliance (see "*Factors That May Affect Future Results – Concentration of Lessees and Aircraft Type,*" below).

(b) Operating Segments

The Company operates in one business segment, the leasing of regional aircraft to foreign and domestic regional airlines, and therefore does not present separate segment information for lines of business.

At February 28, 2014, the dominant types of aircraft in the Company's portfolio were as follows:

Model	Number owned	% of net book value
Bombardier Dash-8-300	9	19%
Bombardier CRJ-700	3	17%
Fokker 100	7	16%
Bombardier Dash-8-Q400	3	14%
Bombardier CRJ-705	1	10%

- 7 -

For the month ended February 28, 2014, the Company's most significant sources of operating lease revenue were from the following regions:

Region	Number of lessees	% of operating lease revenue
North America	2	26%
Africa	2	22%
Asia	4	17%
Caribbean	1	15%
Europe	4	15%

(c) Remarketing Efforts

In March 2014, the Company sold a Fokker 50 aircraft. The Company is seeking remarketing opportunities for three Fokker 50 aircraft and one Saab 340B aircraft, which were returned in the second quarter of 2012, as well as a General Electric CF34-8E5 engine, which was returned in the fourth quarter of 2013.

In October 2013, the Company delivered a Fokker 100 aircraft to a new customer, and that customer has indicated that it may lease another of the Company's Fokker 100 aircraft, six of which were off lease at December 31, 2013. The Company has a signed letter of intent for the lease of two of the off-lease Fokker 100 aircraft, received an initial deposit and expects to deliver the aircraft during the second quarter of 2014. Although the Company had a signed letter of intent for the lease of the other three off-lease Fokker 100 aircraft with a start-up airline and received an initial deposit in 2013, the Company returned the deposit in early 2014 after a change in the customer's business plan. The Company is seeking remarketing opportunities for these Fokker 100 aircraft.

Unless they are renewed, leases for four of the Company's assets will expire during the first half of 2014 and the assets will be returned to the Company.

Two of the assets to be returned in 2014 are Dash-8-300 aircraft, which are on lease to a customer that is replacing its fleet with a different type of aircraft. The customer expects to return these aircraft, as well as two other Dash-8-300 aircraft it leases from the Company, in 2014 and early 2015. The Company will likely incur substantial maintenance expense in late 2014 or early 2015 related to the return of one of the aircraft when the customer uses non-refundable maintenance reserves to meet the return conditions of the lease. Such reserves, expected to total approximately \$1.2 million, have been recorded as maintenance reserves revenue during the lease. Although the Company does not hold maintenance reserves for the remaining two aircraft to be returned, it holds security deposits of \$1.0 million for each aircraft, which will be returned to the customer upon completion of the maintenance work required by the leases. Management believes that, given the current market for Dash-8-300 aircraft, it will be able to re-lease or sell the four returned aircraft in a timely manner.

The Company is considering selling some or all of its off-lease aircraft. The Company is analyzing the amount and timing of maintenance required to remarket the aircraft, the amount of which may differ significantly if the aircraft are sold rather than re-leased.

(d) Credit Facility

As discussed above in *Liquidity and Capital Resources – Credit Facility*, in November 2013, the Company obtained a waiver of compliance with a customer concentration covenant under its Credit Facility agreement at the September 30, 2013 and December 31, 2013 calculation dates.

The Company believes that available borrowings under the Credit Facility, considering possible lessee arrearages or off-lease periods, will be sufficient to meet its continuing obligations and to fund anticipated acquisitions. However, there can be no assurance the Company's beliefs will prove to be correct and that the Company will have sufficient cash to make any required Credit Facility repayments. In addition, there can be no assurance that the Company will be in compliance with the covenants under the Credit Facility through its term, and in the event of any non-compliance, the Company will need to seek waivers or amendment of applicable covenants from its lenders if such compliance failure is not timely cured. Any default under the Credit Facility, if not cured in the time permitted under the facility or waived by the lenders, could result in foreclosure upon any or all of the assets of the Company.

Factors that May Affect Future Results

Ownership Risks. The Company's leases are typically less than the entire anticipated remaining useful life of the leased assets. The Company's ability to recover its investment in an asset subject to such a lease is dependent upon the Company's ability to profitably re-lease or sell the asset after the expiration of the lease term. Some of the factors that have an impact on the Company's ability to re-lease or sell the asset include worldwide economic conditions, general aircraft market conditions, regulatory changes that may make an asset's use more expensive or preclude use due to the age of the aircraft or unless the asset is modified, changes in the supply or cost of aircraft equipment and technological developments that cause the asset to become obsolete. If the Company is unable to remarket its assets on favorable terms when the leases for such assets expire, the Company's financial condition, cash flow, ability to service debt and results of operations could be adversely affected.

The Company acquires used aircraft equipment. The market for used aircraft equipment has been cyclical, and generally reflects economic conditions and the strength of the travel and transportation industry. The demand for and value of many types of used aircraft in the recent past has been depressed by such factors as airline financial difficulties, the number of new aircraft on order and the number of aircraft coming off lease, as well as introduction of new aircraft models and types that may be more technologically advanced, more fuel efficient and/or less costly to maintain and operate. Values may also increase for certain aircraft types that become desirable based on market conditions and changing airline capacity.

In addition, a successful investment in an asset subject to a lease depends in part upon having the asset returned by the lessee in the condition as required under the lease. Each lease typically obligates a customer to return an asset to the Company in a specified condition, which generally requires it be returned in equal or better condition than at delivery to the lessee. If the lessee becomes insolvent during the term of its lease and the Company has to repossess the asset, it is unlikely that the lessee will have the financial ability to meet these return obligations and it is likely that the Company would be required to expend funds in excess of any maintenance reserves collected to return the asset to a remarketable condition. If the lessee files for bankruptcy and rejects the aircraft lease, although the lessee is required to return the aircraft, the lessee is relieved from all further obligations under the lease, including the obligation to return the aircraft in the condition required under the lease. In that case, it is also likely that the Company would be required to expend funds in excess of any maintenance reserves collected to return the asset to a remarketable condition.

Several of the Company's leases do not require payment of monthly maintenance reserves, which serve as the lessee's advance payment for its future repair and maintenance obligations. If repossession due to lessee default or bankruptcy occurs under such a lease, the Company will be left with the costs of unperformed repair and maintenance under the applicable lease and the Company may incur an unanticipated expense in order to re-lease or sell the asset.

Furthermore, the occurrence of unexpected adverse changes that impact the Company's estimates of expected cash flows generated from an asset may result in an asset impairment charge against the Company's earnings. The Company periodically reviews long-term assets for impairment, in particular, when events or changes in circumstances indicate the carrying value of an asset may not be recoverable. An impairment loss is recognized when the carrying amount of an asset is estimated to be not recoverable and exceeds its fair value. The Company may be required to recognize asset impairment charges in the future as a result of a prolonged weak economic environment, challenging market conditions in the airline industry or events related to particular lessees, assets or asset types.

Lessee Credit Risk. The Company carefully evaluates the credit risk of each customer and attempts to obtain a third party guaranty, letters of credit or other credit enhancements, if it deems them necessary in addition to customary security deposits. There can be no assurance, however, that such enhancements will be available, or that, if obtained, will fully protect the Company from losses resulting from a lessee default or bankruptcy.

If a lessee that is a certified U.S. airline were in default under a lease and sought protection under Chapter 11 of the United States Bankruptcy Code, Section 1110 of the Bankruptcy Code would automatically prevent the Company from exercising any remedies against such lessee for a period of 60 days. After the 60-day period had passed, the lessee would have to agree to perform the lease obligations and cure any defaults, or the Company would have the right to repossess the equipment. However, this procedure under the Bankruptcy Code has been subject to significant litigation, and it is possible that the Company's enforcement rights may be further adversely affected by a bankruptcy filing by a defaulting lessee.

Several of the Company's customers have experienced significant financial difficulties, become insolvent, or have been declared or have filed for bankruptcy. Such an insolvency or bankruptcy usually discharges all unpaid obligations of the customer existing at the time of the filing, resulting in a total loss of those receivables. The Company closely monitors the performance of all of its lessees and its risk exposure to any lessee that may be facing financial difficulties, in order to guide decisions with respect to such lessee that would mitigate losses in the event the lessee is unable to meet or rejects its lease obligations. There can be no assurance that additional customers will not become insolvent or file for bankruptcy or that the Company will be able to mitigate any of the resultant losses.

Risks of Debt Financing; Credit Facility Financial Covenants. The Company's use of debt as the primary form of acquisition financing subjects the Company to increased risks associated with leveraging. In addition to payment obligations, the Credit Facility agreement includes financial covenants, including some requiring the company to have positive earnings, meet minimum net worth standards and be in compliance with certain financial ratios. There can be no assurance that the Company will be in compliance with these covenants under the Credit Facility through its term, and in the event of any non-compliance, the Company would need to seek waivers or amendment of applicable covenants from its lenders if such compliance

failure is not timely cured. The Company's assets secure its debt financing, and any default in payment obligations or other covenants under the Credit Facility, if not cured in the time permitted under the facility or waived by the lenders, could result in foreclosure upon any or all of the assets of the Company.

Credit Facility Debt Limitations. Under the Credit Facility, the amount available to be borrowed is limited to the total amount of asset-specific advance rates (expressed as a percentage of each asset's net book or appraised value). Lessee arrearages or asset off-lease periods may reduce the advance rate for the related assets and, therefore, the permitted borrowing under the facility. Amounts subject to deferral agreements also reduce the borrowing base. The Company believes it will have sufficient cash funds to make any required principal repayment that arises due to any such borrowing base limitations.

Availability of Financing. The Company's continued growth will depend on its ability to continue to obtain capital, either through debt or equity financings. The financial markets have experienced significant setbacks that have continued to make access to capital and asset-based debt financing more costly and difficult to obtain. There can be no assurance that the Company's belief regarding the availability of financing under the current Credit Facility will prove to be correct, or that the Company will succeed in finding additional funding, and if such financing is found, it may be on terms less favorable than the Company's current debt financings.

- 9 -

General Economic Conditions and Lowered Demand for Travel. The Company's business is dependent upon general economic conditions and the strength of the travel and transportation industry. The industry is continuing to experience financial difficulty due to the slow recovery in the global economy. Passenger volume has fallen significantly for many carriers, and the loss of revenue has affected their financial condition. The current lending environment has made it difficult or impossible for many regional carriers to find the additional debt financing on which they have traditionally relied. The confluence of these economic factors increases the likelihood of failures among the Company's customers. The spread of a disease epidemic, the threat or execution of a terrorist attack against aviation, a worsening financial/bank crisis in Europe, a natural event that interrupts air traffic, political crises or other events that cause a prolonged spike in fuel prices, or other like events could exacerbate an already weakened condition and lead to widespread failures in the air carrier industry. If lessees experience financial difficulties and are unable to meet lease obligations, this will, in turn, negatively affect the Company's financial performance.

Airline reductions in capacity in response to lower passenger loads have resulted in reduced demand for aircraft and aircraft engines and a corresponding decrease in market lease rental rates and aircraft values for many aircraft types. This reduced market value could affect the Company's results if the market value of an asset or assets in the Company's portfolio falls below carrying value, and the Company determines that a write-down of the value on its balance sheet is appropriate. Furthermore, if older, expiring leases are replaced with leases at decreased lease rates, the lease revenue from the Company's existing portfolio is likely to decline, with the magnitude of the decline dependent on the length of the downturn and the depth of the decline in market rents.

Economic downturns can affect certain regions of the world more than others. As the Company's portfolio is not entirely globally diversified, a localized downturn in one of the key regions in which the Company leases assets could have a significant adverse impact on the Company. The Company's significant sources of operating lease revenue by region are summarized in "*Outlook - Operating Segments,*" above.

Over the last few years, several of the Company's customers have experienced financial difficulties arising from a combination of the weakened air carrier market and their own unique financial circumstances and have requested and been granted deferral of certain overdue and/or future rental or reserve payment obligations. It is possible that the Company may enter into additional deferral agreements if the current weakened air carrier environment continues. When a customer requests a deferral of lease obligations, the Company evaluates the lessee's financial plan, the likelihood that the lessee can remain a viable carrier, and whether the deferral will be repaid according to the agreed schedule. The Company may elect to record the deferred rent and reserve payments from the lessee on a cash basis, which could have a material effect on the Company's financial results in the applicable periods.

Risks Related to Regional Air Carriers. The Company's continued focus on its customer base of regional air carriers subjects the Company to additional risks. Some of the lessees in the regional air carrier market are companies that are start-up, low-capital, and/or low-margin operators. Often, the success of such carriers depends on contractual arrangements with major trunk carriers or franchises from governmental agencies that provide subsidies for operating essential air routes, both of which may be subject to termination or cancellation with short notice periods. Regional carriers, even if financially strong, that are owned by, or are a sister corporation of, an established major carrier can also be swept into bankruptcy if the major carrier files for bankruptcy or becomes insolvent. Two of the Company's regional air carrier customers, one located in the United States and the other in Sweden, filed for bankruptcy in 2012, and two customers, located in Germany and the Netherlands Antilles, filed for bankruptcy in 2013.

International Risks. The Company leases assets primarily in overseas markets. Leases with foreign lessees, however, may present different risks than those with domestic lessees. Most of the Company's expected growth is outside of the United States.

General Economic Conditions and Lowered Demand for Travel. The Company's business is dependent upon general economic conditions and the strength of the travel and transportation industry. The industry is continuing to experience financial difficulty due to the slow recovery in the global economy. Regional carriers, even if financially strong, that are owned by, or are a sister corporation of, an established major carrier can also be swept into bankruptcy if the major carrier files for bankruptcy or becomes insolvent. Two of the Company's regional air carrier customers, one located in the United States and the other in Sweden, filed for bankruptcy in 2012, and two customers, located in Germany and the Netherlands Antilles, filed for bankruptcy in 2013.

International Risks. The Company leases assets primarily in overseas markets. Leases with foreign lessees, however, may present different risks than those with domestic lessees. Most of the Company's expected growth is outside of the United States.

A lease with a foreign lessee is subject to risks related to the economy of the country or region in which such lessee is located, which may be weaker than the U.S. economy. An economic downturn in a particular country or region may impact a foreign lessee's ability to make lease payments, even if the U.S. and other foreign economies remain stable.

Foreign lessees are subject to risks related to currency conversion fluctuations. Although the Company's current leases are all payable in U.S. dollars, the Company may agree in the future to leases that permit payment in foreign currency, which would subject such lease revenue to monetary risk due to currency fluctuations. In addition, if the Company undertakes certain obligations under a lease to contribute to a repair or improvement and if the work is performed in a foreign jurisdiction and paid for in foreign currency, currency fluctuations resulting in a weaker dollar between the time such agreement is made and the time payment for the work is made may result in an unanticipated increase in U.S. dollar-denominated cost for the Company.

Even with U.S. dollar-denominated lease payment provisions, the Company could still be affected by a devaluation of the lessee's local currency that would make it more difficult for a lessee to meet its U.S. dollar-denominated payments, increasing the risk of default of that lessee, particularly if its revenue is primarily derived in the local currency.

Foreign lessees that operate internationally may also face restrictions on repatriating foreign revenue to their home country. This could create a cash flow crisis for an otherwise profitable carrier, affecting its ability to meet its lease obligations.

Non-U.S. lessees are not subject to U.S. bankruptcy laws, although there may be debtor protection similar to U.S. bankruptcy laws available in some jurisdictions. Certain countries do not have a central registration or recording system with which to locally establish the Company's interest in equipment and related leases. This could make it more difficult for the Company to recover an aircraft in the event of a default by a foreign lessee. In any event, collection and enforcement may be more difficult and complicated in foreign countries.

Finally, ownership of a leased asset operating in a foreign country and/or by a foreign carrier may subject the Company to additional tax liabilities that are not present with aircraft operated in the United States. Depending on the jurisdiction, laws governing such tax liabilities may be complex, not well formed or not uniformly enforced. In such jurisdictions, the Company may decide to take an uncertain tax position based on the best advice of the local tax experts it engages, which position may be challenged by the taxing authority. If the taxing authority later assesses a liability, the Company may be required to pay penalties and interest on the assessed amount, which penalties and interest would not give rise to a corresponding foreign tax credit on the Company's U.S. tax return.

Concentration of Lessees and Aircraft Type. For the month ended February 28, 2014, based on monthly operating lease revenue and interest income from finance leases, the Company's three largest customers accounted for a total of approximately 50% of the Company's monthly lease revenue. A lease default by or collection problem with one or a combination of any of these significant customers could have a disproportionate negative impact on the Company's financial results and borrowing base under the Credit Facility, and, therefore, the Company's operating results are especially sensitive to any negative developments with respect to these customers in terms of lease compliance or collection. In addition, if the Company's revenues become overly concentrated in a small number of lessees, the Company could fail to comply with certain financial covenants in its Credit Facility related to customer concentration. In the event of any such failure to be in compliance, the Company will need to seek waivers or amendment of the applicable covenants from its lenders if such compliance failure is not timely cured. Any default under the Credit Facility, if not cured in the time permitted under the Credit Facility or waived by the lenders, could result in foreclosure upon any or all of the assets of the Company.

The dominant types of aircraft in the Company's portfolio are summarized in "*Outlook - Operating Segments,*" above. A change in the desirability and availability of any of these types of aircraft, which would in turn affect valuations of such aircraft, would have a disproportionately significant impact on the Company's portfolio value. Such aircraft type concentration would diminish if the Company acquires additional assets of other types. Conversely, acquisition of these types of aircraft will increase the Company's risks related to its concentration of those aircraft types.

- 10 -

Investment in New Aircraft Types and Engines. The Company intends to continue to focus solely on regional aircraft and engines. Although the Company has traditionally invested in a limited number of types of turboprop aircraft and engines, the Company has also acquired several types of regional jet aircraft, as well as regional jet aircraft engines, and may continue to seek acquisition opportunities for new types and models of aircraft and engines used in the Company's targeted customer base of regional air carriers. Acquisition of aircraft types and engines not previously acquired by the Company entails greater ownership risk due to the Company's lack of experience managing those assets. The Company believes, however, that the overall industry experience of JMC's personnel and its technical resources should permit the Company to effectively manage such new aircraft types and engines. Further, the broadening of the asset types in the aircraft portfolio may have a benefit of diversifying the Company's portfolio (see "*Factors That May Affect Future Results – Concentration of Lessees and Aircraft Type,*" above).

Engine Leasing Risk. The Company currently has six engines in its portfolio, making up 6% of the Company's total net book value of aircraft and aircraft engines held for lease. The Company may from time to time lease one or more of these engines under industry standard short-term engine leases, which place the risk of an engine failure not caused by lessee negligence or foreign object damage upon the lessor. It is not economically practicable for an engine lessor to insure against that risk. If an engine failure occurs and is not covered by a manufacturer's warranty or is not otherwise caused by circumstances that the lessee is required to cover, the Company's investment in the engine could be a significant loss or the Company might incur a significant maintenance expense.

Interest Rate Risk. The Credit Facility carries a floating interest rate based upon short-term interest rate indices. Lease rates typically, but not always, move over time with interest rates, but market demand and numerous other asset-specific factors also affect lease rates. Because the Company's typical lease rates are fixed at lease origination, interest rate changes during the lease term have no effect on existing lease rental payments. Therefore, if interest rates rise significantly and there is relatively little lease origination by the Company following such rate increases, the Company could experience decreased net income as additional interest expense outpaces revenue growth. Further, even if significant lease origination occurs following such rate increases, other contemporaneous aircraft market forces may result in lower or flat rental rates, thereby decreasing net income.

Reliance on JMC. All management of the Company is performed by JMC under the twenty-year Management Agreement between the Company and JMC that expires in April of 2018 and provides for an asset-based management fee. JMC is not a fiduciary of the Company or its stockholders. The Company's Board of Directors (the "Board") has ultimate control and supervisory responsibility over all aspects of the Company and owes fiduciary duties to the Company and its stockholders. The Board has no control over the internal operations of JMC, but the Board does have the ability and responsibility to manage the Company's relationship with JMC and the performance of JMC's obligations to the Company under the Management Agreement, as it would have for any third party service provider to the Company. While JMC may not owe any fiduciary duties to the Company by virtue of the Management Agreement, all of the officers of JMC are also officers of the Company, and in that capacity owe fiduciary duties to the

Investment in New Aircraft Types and Engines. The Company intends to continue to focus solely on regional aircraft and engines. Although the Company has traditionally invested in a limited number of types of turboprop aircraft and engines, the Company has also acquired several types of regional jet aircraft, as well as regional jet aircraft engines, and may continue to seek acquisition opportunities for new types and models of aircraft and engines used in the Company's targeted customer base of regional air carriers. Acquisition of aircraft types and engines not previously acquired by the Company entails greater ownership risk due to the Company's lack of experience managing those assets. The Company believes, however, that the overall industry experience of JMC's personnel and its technical resources should permit the Company to effectively manage such new aircraft types and engines. Further, the broadening of the asset types in the aircraft portfolio may have a benefit of diversifying the Company's portfolio (see "*Factors That May Affect Future Results – Concentration of Lessees and Aircraft Type,*" above).

Engine Leasing Risk. The Company currently has six engines in its portfolio, making up 6% of the Company's total net book value of aircraft and aircraft engines held for lease. The Company may from time to time lease one or more of these engines under industry standard short-term engine leases, which place the risk of an engine failure not caused by lessee negligence or foreign object damage upon the lessor. It is not economically practicable for an engine lessor to insure against that risk. If an engine failure occurs and is not covered by a manufacturer's warranty or is not otherwise caused by circumstances that the lessee is required to cover, the Company's investment in the engine could be a significant loss or the Company might incur a significant maintenance expense.

Interest Rate Risk. The Credit Facility carries a floating interest rate based upon short-term interest rate indices. Lease rates typically, but not always, move over time with interest rates, but market demand and numerous other asset-specific factors also affect lease rates. Because the Company's typical lease rates are fixed at lease origination, interest rate changes during the lease term have no effect on existing lease rental payments. Therefore, if interest rates rise significantly and there is relatively little lease origination by the Company following such rate increases, the Company could experience decreased net income as additional interest expense outpaces revenue growth. Further, even if significant lease origination occurs following such rate increases, other contemporaneous aircraft market forces may result in lower or flat rental rates, thereby decreasing net income.

Reliance on JMC. All management of the Company is performed by JMC under the twenty-year Management Agreement between the Company and JMC that expires in April of 2018 and provides for an asset-based management fee. JMC is not a fiduciary of the Company or its stockholders. The Company's Board of Directors (the "Board") has ultimate control and supervisory responsibility over all aspects of the Company and owes fiduciary duties to the Company and its stockholders. The Board has no control over the internal operations of JMC, but the Board does have the ability and responsibility to manage the Company's relationship with JMC and the performance of JMC's obligations to the Company under the Management Agreement, as it would have for any third party service provider to the Company. While JMC may not owe any fiduciary duties to the Company by virtue of the Management Agreement, all of the officers of JMC are also officers of the Company, and in that capacity owe fiduciary duties to the Company and its stockholders. In addition, certain officers of the Company hold significant ownership positions in the Company and JHC, the parent company of JMC.

The Management Agreement may be terminated if JMC defaults on its obligations to the Company. However, the agreement provides for liquidated damages in the event of its wrongful termination by the Company. Certain directors of the Company are also directors of JMC and, as discussed above, the officers of the Company are also officers of JMC and certain officers hold significant ownership positions in both the Company and JHC, the holding company for JMC. Consequently, the directors and officers of JMC may have a conflict of interest in the event of a dispute between the Company and JMC. Although the Company has taken steps to prevent conflicts of interest arising from such dual roles, such conflicts may still occur.

JMC has acted as the management company for two other aircraft portfolio owners, JetFleet III, which raised approximately \$13 million in bond issuance proceeds, and AeroCentury IV, Inc. ("AeroCentury IV"), which raised approximately \$5 million in bond issuance proceeds. In the first quarter of 2002, AeroCentury IV defaulted on certain bond obligations. In June 2002, the indenture trustee for AeroCentury IV's bondholders repossessed AeroCentury IV's assets and took over management of AeroCentury IV's remaining assets. JetFleet III defaulted on its bond obligation of \$11.1 million in May 2004. The indenture trustee for JetFleet III bondholders repossessed JetFleet III's unsold assets in late May 2004.

Management Fee Structure. All decisions regarding acquisitions and disposal of aircraft from the Company's portfolio are made by JMC. JMC is paid a management fee based on the net asset value of the Company's portfolio. It may also receive a one-time asset acquisition fee upon purchase of an asset by the Company, and a one-time remarketing fee in connection with the sale or re-lease of an asset. Optimization of the results of the Company depends on timing of the acquisition, lease yield on the acquired assets, and re-lease or sale of its portfolio assets. Under the current management fee structure, a larger volume of acquisitions generates acquisition fees and also increases the periodic management fee by increasing the size of the aircraft portfolio. Since the Company's current business strategy involves continued growth of its portfolio and a "buy and hold" strategy, a compensation structure that results in greater compensation with an increased portfolio size is consistent with that strategy. The compensation structure does, nonetheless, create a situation where a decision by JMC for the Company to forego an asset transaction deemed to be an unacceptable business risk due to the lessee or the aircraft type is in conflict with JMC's own pecuniary interest. As a result, the compensation structure could act to incent greater risk-taking by JMC in asset acquisition decision-making. The Company has established objective target guidelines for yields on acquired assets. Further, the Company's Board, including a majority of the outside independent directors, must approve any acquisition that involves a new asset type. While the Company currently believes the foregoing are effective mitigating factors against undue compensation-incented risk-taking by JMC, there is no assurance that such mechanisms can entirely and effectively eliminate such risk.

Government Regulation. There are a number of areas in which government regulation may result in costs to the Company. These include aircraft registration safety requirements, required equipment modifications, maximum aircraft age, and aircraft noise requirements. Although it is contemplated that the burden and cost of complying with such requirements will fall primarily upon lessees of equipment, there can be no assurance that the cost will not fall on the Company. Furthermore, future government regulations could cause the value of any non-complying equipment owned by the Company to decline substantially.

Competition. The aircraft leasing industry is highly competitive. The Company competes with aircraft manufacturers, distributors, airlines and aircraft operators, equipment managers, leasing companies, equipment leasing programs, financial institutions and other parties engaged in leasing, managing or remarketing aircraft, many of which have significantly greater financial resources. Nevertheless, the Company believes that it is competitive because of JMC's experience and operational efficiency in identifying and obtaining financing for the transaction types desired by regional air carriers. This market segment, which is characterized by transaction sizes of less than \$10 million and in many cases customers that are private companies without well-established third party credit ratings, is not well served by the Company's larger competitors. JMC has developed a reputation as a global participant in this segment of the market, and the Company believes that JMC's reputation benefits the Company. There is, however, no assurance that competition from larger aircraft leasing companies will not increase significantly or that JMC's reputation will continue to be strong in this market segment.

- 11 -

Casualties, Insurance Coverage. The Company, as owner of transportation equipment, may be named in a suit claiming damages for injuries or damage to property caused by its assets. As a triple-net lessor, the Company is generally protected against such claims, since the lessee would be responsible for, insure against and indemnify the Company for such claims. A "triple net lease" is a lease under which, in addition to monthly rental payments, the lessee is generally responsible for the taxes, insurance and maintenance and repair of the aircraft arising from the use and operation of the aircraft during the term of the lease. Although the United States Aviation Act may provide some protection with respect to the Company's aircraft assets, it is unclear to what extent such statutory protection would be available to the Company with respect to most of the Company's assets, which are operated in foreign countries where such provisions of the United States Aviation Act may not apply.

The Company's leases generally require a lessee to insure against likely risks of loss or damage to the leased asset, and liability to passengers and third parties pursuant to industry standard insurance policies and require lessees to provide insurance certificates documenting the policy periods and coverage amounts. The Company tracks receipt of the certificates and calendars their expiration dates. Prior to the expiration of an insurance certificate, if a replacement certificate has not been received, the Company reminds the lessee of its obligation to provide current insurance certificates to avoid a default under the lease.

Despite these requirements and procedures, there may be certain cases where the loss is not entirely covered by the lessee or its insurance. The possibility of such an event is remote, but any such uninsured loss with respect to the equipment or insured loss for which insurance proceeds are inadequate might result in a loss of invested capital in and any profits anticipated from, such equipment, as well as a potential claim directly against the Company.

Compliance with Future Environmental Regulations. Compliance with future environmental regulations may harm the Company's business. Many aspects of aircraft operations are subject to increasingly stringent environmental regulations, and growing concerns about climate change may result in the imposition by the U.S and foreign governments of additional regulation of carbon emissions, aimed at either requiring adoption of technology to reduce the amount of carbon emissions or putting in place a fee or tax system on carbon emitters. It is likely that any such regulation will be directed at the Company's customers, as operators of aircraft, or at the Company, as owners of aircraft. Under the Company's triple-net lease arrangements, the Company would likely shift responsibility for compliance to its lessees, but there might be some costs of regulation that the Company could not shift and would itself have to bear. Although it is not expected that the costs of complying with current environmental regulations will have a material adverse effect on the Company's financial position, results of operations, or cash flows, no assurance can be given that the costs of complying with environmental regulations adopted in the future will not have such an effect.

Cyber-Security Risks. The Company believes that it has sufficient cyber-security measures in place commensurate with the risks to the Company of a successful cyber-attack or breach of security. The Company's main vulnerability to a cyber-attack would be interruption of the Company's email communications internally and with third parties, and loss of document sharing between the Company's offices and remote workers. Such an attack could temporarily impede the efficiency of the Company's operations; however, the Company believes that sufficient replacement mechanisms exist in the event of such an interruption that there would not be a material adverse financial impact on the Company's business.

Warrants. As part of a previous subordinated debt financing, which was fully repaid in December of 2011, the Company issued warrants to purchase up to 81,224 shares of the Company's common stock that are currently exercisable (and expire on December 31, 2015) and represent approximately 5% of the post-exercise fully diluted capitalization of the Company. The exercise price of the warrants is \$8.75 per share. If the warrants to purchase shares are exercised at a time when the exercise price is less than the market price of the Company's common stock, there will be dilution to the existing holders of common stock. This dilution of the Company's common stock could depress its trading price.

Casualties, Insurance Coverage. The Company, as owner of transportation equipment, may be named in a suit claiming damages for injuries or damage to property caused by its assets. As a triple-net lessor, the Company is generally protected against such claims, since the lessee would be responsible for, insure against and indemnify the Company for such claims. A “triple net lease” is a lease under which, in addition to monthly rental payments, the lessee is generally responsible for the taxes, insurance and maintenance and repair of the aircraft arising from the use and operation of the aircraft during the term of the lease. Although the United States Aviation Act may provide some protection with respect to the Company’s aircraft assets, it is unclear to what extent such statutory protection would be available to the Company with respect to most of the Company’s assets, which are operated in foreign countries where such provisions of the United States Aviation Act may not apply.

The Company’s leases generally require a lessee to insure against likely risks of loss or damage to the leased asset, and liability to passengers and third parties pursuant to industry standard insurance policies and require lessees to provide insurance certificates documenting the policy periods and coverage amounts. The Company tracks receipt of the certificates and calendars their expiration dates. Prior to the expiration of an insurance certificate, if a replacement certificate has not been received, the Company reminds the lessee of its obligation to provide current insurance certificates to avoid a default under the lease.

Despite these requirements and procedures, there may be certain cases where the loss is not entirely covered by the lessee or its insurance. The possibility of such an event is remote, but any such uninsured loss with respect to the equipment or insured loss for which insurance proceeds are inadequate might result in a loss of invested capital in and any profits anticipated from, such equipment, as well as a potential claim directly against the Company.

Compliance with Future Environmental Regulations. Compliance with future environmental regulations may harm the Company’s business. Many aspects of aircraft operations are subject to increasingly stringent environmental regulations, and growing concerns about climate change may result in the imposition by the U.S and foreign governments of additional regulation of carbon emissions, aimed at either requiring adoption of technology to reduce the amount of carbon emissions or putting in place a fee or tax system on carbon emitters. It is likely that any such regulation will be directed at the Company’s customers, as operators of aircraft, or at the Company, as owners of aircraft. Under the Company’s triple-net lease arrangements, the Company would likely shift responsibility for compliance to its lessees, but there might be some costs of regulation that the Company could not shift and would itself have to bear. Although it is not expected that the costs of complying with current environmental regulations will have a material adverse effect on the Company’s financial position, results of operations, or cash flows, no assurance can be given that the costs of complying with environmental regulations adopted in the future will not have such an effect.

Cyber-Security Risks. The Company believes that it has sufficient cyber-security measures in place commensurate with the risks to the Company of a successful cyber-attack or breach of security. The Company’s main vulnerability to a cyber-attack would be interruption of the Company’s email communications internally and with third parties, and loss of document sharing between the Company’s offices and remote workers. Such an attack could temporarily impede the efficiency of the Company’s operations; however, the Company believes that sufficient replacement mechanisms exist in the event of such an interruption that there would not be a material adverse financial impact on the Company’s business.

Warrants. As part of a previous subordinated debt financing, which was fully repaid in December of 2011, the Company issued warrants to purchase up to 81,224 shares of the Company’s common stock that are currently exercisable (and expire on December 31, 2015) and represent approximately 5% of the post-exercise fully diluted capitalization of the Company. The exercise price of the warrants is \$8.75 per share. If the warrants to purchase shares are exercised at a time when the exercise price is less than the market price of the Company’s common stock, there will be dilution to the existing holders of common stock. This dilution of the Company’s common stock could depress its trading price.

Possible Volatility of Stock Price. The market price of the Company’s common stock may be subject to fluctuations following developments relating to the Company’s operating results, changes in general conditions in the economy, the financial markets, the airline industry, changes in accounting principles or tax laws applicable to the Company or its lessees, or other developments affecting the Company, its customers or its competitors, or arising from other investor sentiment unknown to the Company. Because the Company has a relatively small capitalization of approximately 1.5 million shares outstanding, there is a correspondingly limited amount of trading and float of the Company’s shares. Consequently, the Company’s stock price is more sensitive to a single large trade or a small number of simultaneous trades along the same trend than a company with larger capitalization and higher trading volume and float.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

AeroCentury Corp.

Burlingame, California

We have audited the accompanying balance sheets of AeroCentury Corp. as of December 31, 2013 and 2012 and the related statements of operations, stockholders’ equity, and cash flows for each of the two years in the period ended December 31, 2013. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of AeroCentury Corp. at December 31, 2013 and 2012, and the results of its operations and its cash flows for each of the two years in the period ended December 31, 2013, in conformity with accounting principles generally accepted in the United States of America.

Cash and cash equivalents, end of year	<u>\$ 2,112,700</u>	<u>\$ 1,596,800</u>

During the years ended December 31, 2013 and 2012, the Company paid interest totaling \$3,077,100 and \$3,572,600, respectively. During the year ended December 31, 2013, the Company paid income taxes totaling \$800 and received a state tax refund of \$2,000. During the year ended December 31, 2012, the Company paid income taxes totaling \$2,100.

The accompanying notes are an integral part of these statements.

1. Organization and Summary of Significant Accounting Policies

AeroCentury Corp.
Notes to Financial Statements
December 31, 2013

1. Organization and Summary of Significant Accounting Policies

(a) The Company and Basis of Presentation

AeroCentury Corp. (the "Company"), a Delaware corporation incorporated in 1997, acquires used regional aircraft and engines for lease to foreign and domestic regional carriers.

(b) Use of Estimates

The Company's financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable for making judgments that are not readily apparent from other sources.

The most significant estimates with regard to these financial statements are the residual values and useful lives of the assets, the amount and timing of cash flows associated with each asset that are used to evaluate whether assets are impaired, accrued maintenance costs, accounting for income taxes, and the amounts recorded as allowances for doubtful accounts.

(c) Cash and Cash Equivalents

The Company considers highly liquid investments readily convertible into known amounts of cash, with original maturities of 90 days or less from the date of acquisition, as cash equivalents.

(d) Aircraft Capitalization and Depreciation

The Company's interests in aircraft and aircraft engines are recorded at cost, which includes acquisition costs. Since inception, the Company has purchased only used aircraft and aircraft engines. It is the Company's policy to hold aircraft for approximately twelve years unless market conditions dictate otherwise. Therefore, depreciation of aircraft is initially computed using the straight-line method over the twelve-year period to an estimated residual value based on appraisal. For an aircraft engine held for lease as a spare, the Company estimates the length of time that it will hold the aircraft engine based upon estimated usage, repair costs and other factors, and depreciates it to the appraised residual value over such period using the straight-line method.

The Company periodically reviews plans for lease or sale of its aircraft and aircraft engines and changes, as appropriate, the remaining expected holding period for such assets. Estimated residual values are reviewed and adjusted periodically, based upon updated estimates obtained from an independent appraiser. Decreases in the fair value of aircraft could affect not only the current value, discussed below, but also the estimated residual value.

Assets that are held for sale are not subject to depreciation and are separately classified on the balance sheet. Such assets are carried at their estimated fair values, less costs to sell.

AeroCentury Corp.
Notes to Financial Statements
December 31, 2013

1. Organization and Summary of Significant Accounting Policies (continued)

(e) Fair Value Measurements

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs, to the extent possible. The fair value hierarchy under GAAP is based on three levels of inputs.

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Assets and Liabilities Measured and Recorded at Fair Value on a Recurring Basis

The following table shows by level, within the fair value hierarchy, the fair value of the Company's assets that are measured and recorded at fair value on a recurring basis:

	December 31, 2013			December 31, 2012				
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
Money market funds included in cash and cash equivalents	\$ 1,842,000	\$ 1,842,000	\$ -	\$ -	\$ 1,239,500	\$ 1,239,500	\$ -	\$ -
Total	\$ 1,842,000	\$ 1,842,000	\$ -	\$ -	\$ 1,239,500	\$ 1,239,500	\$ -	\$ -

As of December 31, 2013 and December 31, 2012, there were no liabilities that were required to be measured and recorded at fair value on a recurring basis.

Assets Measured and Recorded at Fair Value on a Nonrecurring Basis

The Company determines fair value of long-lived assets held and used, such as aircraft and aircraft engines held for lease and held for sale, by reference to independent appraisals, quoted market prices (e.g., offers to purchase) and other factors. An impairment charge is recorded when the Company believes that the carrying value of an asset will not be recovered through future net cash flows and that the carrying value exceeds its fair value. During the years ended December 31, 2013 and 2012, there were no recorded impairments of long-lived assets.

1. Organization and Summary of Significant Accounting Policies (continued)

(e) Fair Value Measurements (continued)

AeroCentury Corp.
Notes to Financial Statements
December 31, 2013

1. Organization and Summary of Significant Accounting Policies (continued)

(e) Fair Value Measurements (continued)

Fair Value of Other Financial Instruments

The Company's financial instruments, other than cash and cash equivalents, consist principally of finance leases receivable and amounts borrowed under its credit facility (the "Credit Facility," as defined in Note 6). The fair value of accounts receivable, finance leases receivable, accounts payable and the refundable reserves portion of the Company's maintenance reserves and accrued maintenance costs approximates the carrying value of these financial instruments.

Borrowings under the Company's Credit Facility bear floating rates of interest that reset periodically to a market benchmark rate plus a credit margin. The Company believes the effective interest rate of this debt agreement approximates current market rates for such indebtedness at the balance sheet date, and therefore that the carrying amount of its floating rate debt at the balance sheet dates approximates its fair value. The fair value of the Company's outstanding balance of its Credit Facility would be categorized as Level 3 under the GAAP fair value hierarchy.

(f) Impairment of Long-lived Assets

The Company reviews assets for impairment when there has been an event or a change in circumstances indicating that the carrying amount of a long-lived asset may not be recoverable. In addition, the Company routinely reviews all long-lived assets for impairment annually. Recoverability of an asset is measured by comparison of its carrying amount to the future estimated undiscounted cash flows (without interest charges) that the asset is expected to generate. Estimates are based on currently available market data and independent appraisals and are subject to fluctuation from time to time. If these estimated future cash flows are less than the carrying value of an asset at the time of evaluation, any impairment to be recognized is measured by the amount by which the carrying amount of the asset exceeds its fair value. Fair value is determined by reference to independent appraisals and other factors considered relevant by management. Significant management judgment is required in the forecasting of future operating results that are used in the preparation of estimated future undiscounted cash flows and, if different conditions prevail in the future, material write-downs may occur. No impairment provision was recorded in 2013 or 2012.

(g) Deferred Financing Costs and Commitment Fees

Costs incurred in connection with debt financing are deferred and amortized over the term of the debt using the effective interest method or, in certain instances where the differences are not material, using the straight-line method. Costs incurred in connection with the Company's Credit Facility are deferred and amortized using the straight-line method. Commitment fees for unused funds are expensed as incurred.

(h) Security deposits

The Company's leases are typically structured so that if any event of default occurs under a lease, the Company may apply all or a portion of the lessee's security deposit to cure such default. If such application of the security deposit is made, the lessee typically is required to replenish and maintain the full amount of the deposit during the remaining term of the lease. All of the security deposits received by the Company are refundable to the lessee at the end of the lease upon satisfaction of all lease terms.

1. Organization and Summary of Significant Accounting Policies (continued)

AeroCentury Corp.
Notes to Financial Statements
December 31, 2013

1. Organization and Summary of Significant Accounting Policies (continued)

(i) Taxes

As part of the process of preparing the Company's financial statements, management estimates income taxes in each of the jurisdictions in which the Company operates. This process involves estimating the Company's current tax exposure under the most recent tax laws and assessing temporary differences resulting from differing treatment of items for tax and GAAP purposes. These differences result in deferred tax assets and liabilities, which are included in the balance sheet. Management also assesses the likelihood that the Company's deferred tax assets will be recovered from future taxable income, and, to the extent management believes it is more likely than not that some portion or all of the deferred tax assets will not be realized, the Company establishes a valuation allowance. To the extent the Company establishes a valuation allowance or changes the allowance in a period, the Company reflects the corresponding increase or decrease within the tax provision in the statement of operations. Significant management judgment is required in determining the Company's future taxable income for purposes of assessing the Company's ability to realize any benefit from its deferred taxes.

The Company accrues non-income based sales, use, value added and franchise taxes as other tax expense in the statements of operations.

(j) Revenue Recognition, Accounts Receivable and Allowance for Doubtful Accounts

Revenue from leasing of aircraft assets is recognized as operating lease revenue on a straight-line basis over the terms of the applicable lease agreements. Deferred payments are recorded as accrued rent when the cash rent received is lower than the straight-line revenue recognized. Such receivables decrease over the term of the applicable leases. Interest income is recognized on finance leases based on the interest rate implicit in the lease and the outstanding balance of the lease receivable. Non-refundable maintenance reserves are based on usage and are accrued as maintenance reserves revenue.

In instances where collectability is not reasonably assured, the Company recognizes revenue as cash payments are received. The Company estimates and charges to income a provision for bad debts based on its experience with each specific customer, the amount and length of payment arrearages, and its analysis of the lessee's overall financial condition. If the financial condition of any of the Company's customers deteriorates, it could result in actual losses exceeding any estimated allowances.

The Company's allowance for doubtful accounts was \$0 and \$2,419,400 at December 31, 2013 and 2012, respectively.

(k) Comprehensive Income

The Company does not have any comprehensive income other than the revenue and expense items included in the statements of operations. As a result, comprehensive income equals net income for the years ended December 31, 2013 and 2012.

AeroCentury Corp.
Notes to Financial Statements
December 31, 2013

1. Organization and Summary of Significant Accounting Policies (continued)

(l) Finance Leases

The leases for one of the Company's aircraft and two engines contain lessee purchase options at prices substantially below the assets' estimated residual values at the exercise date for the option. Consequently, the Company considers the purchase options to be "bargain purchase options" and has classified such leases as finance leases for financial accounting purposes. The Company does not include the value, purchase price or accumulated

AeroCentury Corp.
Notes to Financial Statements
December 31, 2013

1. Organization and Summary of Significant Accounting Policies (continued)

(l) Finance Leases

The leases for one of the Company's aircraft and two engines contain lessee purchase options at prices substantially below the assets' estimated residual values at the exercise date for the option. Consequently, the Company considers the purchase options to be "bargain purchase options" and has classified such leases as finance leases for financial accounting purposes. The Company does not include the value, purchase price or accumulated depreciation of finance lease assets on its balance sheet. Instead, the discounted present value of (i) future minimum lease payments (including the bargain purchase option) and (ii) any residual value not subject to a bargain purchase option are reported as a finance lease receivable. Rental revenue and depreciation expense are not recognized on finance leases. Rather, the Company accrues interest on the balance of the finance leases receivable based on the interest rate inherent in the applicable lease. The Company recognized interest earned on finance leases as "other income" in the amount of \$175,700 and \$93,800 in 2013 and 2012, respectively.

2. Aircraft and Aircraft Engines Held for Lease or Sale

(a) Assets Held for Lease

At December 31, 2013 and December 31, 2012, the Company's aircraft and aircraft engines, which were on lease or held for lease, consisted of the following:

Model	December 31, 2013		December 31, 2012	
	Number owned	% of net book value	Number owned	% of net book value
Bombardier Dash-8-300	9	23%	9	25%
Fokker 100	7	19%	7	22%
Bombardier Dash-8-Q400	3	17%	3	19%
Bombardier CRJ-705	1	12%	-	-
Fokker 50	10	10%	13	14%
Saab 340B Plus	6	8%	4	6%
General Electric CF34-8E5 engine	3	6%	3	7%
Saab 340B	4	4%	5	5%
Tay 650-15 engine	1	1%	-	-
General Electric CT7-9B engine	2	-	1	-
Saab 340A	1	-	1	-
deHavilland DHC-8-100	-	-	1	1%
deHavilland DHC-6	-	-	1	1%

Net book value excludes the Company's Saab 340A aircraft and the two General Electric CT7-9B engines, which are subject to finance leases.

During 2013 and 2012, the Company used cash of \$24,965,500 and \$30,632,200 for the purchase and capital improvement of aircraft.

During 2013, the Company recorded gains totaling \$4,504,200 related to the sale of three Fokker 50 aircraft, a deHavilland DHC-8-100 aircraft, a deHavilland DHC-6 aircraft and a General Electric CT7-9B engine. The Company also leased an engine pursuant to a finance lease and recorded a related gain of \$73,300. In addition, the Company recorded a loss of \$769,300 on the disposal of a Tay 650-15 engine, which was replaced by one of the Company's spare engines.

AeroCentury Corp.
Notes to Financial Statements
December 31, 2013

2. Aircraft and Aircraft Engines Held for Lease or Sale (continued)

(a) Assets Held for Lease (continued)

During 2012, the Company recorded gains totaling \$1,373,800 related to the sale of a Bombardier Dash-8-100, a Fokker 50 aircraft and a General Electric CT7-9B engine. The Company also leased an engine pursuant to a finance lease and recorded a related gain of \$112,300.

During 2013, the Company extended the leases for eight of its assets and leased three assets that had been off lease at December 31, 2012.

In August 2013, the lessee of three of the Company's Fokker 100 aircraft was declared bankrupt and the lessee returned the aircraft to the Company. In connection with the bankruptcy, the Company recorded a bad debt expense of \$357,600.

At December 31, 2013, thirteen of the Company's assets, comprised of four Fokker 50 aircraft, one Saab 340B aircraft, six Fokker 100 aircraft, one General Electric CF34-8E5 engine and one Tay 650-15 engine, which represented 23% of the net book value of the Company's aircraft and engines, were off lease.

As discussed in Note 12, the Company sold a Fokker 50 aircraft in March 2014. The Company is seeking re-lease opportunities for the other off-lease assets, other than the Tay 650-15 engine that is being held as a spare and used in connection with required maintenance on the Company's Fokker 100 aircraft.

(b) Assets Held for Sale

During 2012, the Company classified the airframe and one engine from one of the Company's aircraft as held for sale. The engine was sold during 2012 at a gain of \$50,900. During 2013, the Company classified an additional airframe and engine from another aircraft as held for sale, and sold the engine during the year, generating a gain of \$6,600. During 2013 and 2012, the Company received \$495,100 and \$0 from the sale of parts belonging to the two airframes. No adjustments to the carrying value of the Company's assets held for sale were recorded during 2013 and 2012.

3. Maintenance Reserves and Accrued Maintenance Costs

Maintenance costs under the Company's triple net leases are generally the responsibility of the lessees. Most of the Company's leases require payment of maintenance reserves, which are based upon lessee-reported usage and billed monthly, and are intended to accumulate and be applied by the Company toward reimbursement of most or all of the cost of the lessees' performance of certain maintenance obligations under the leases. Maintenance reserves are characterized as either refundable or non-refundable depending on their disposition at lease end.

Maintenance reserves and accrued costs in the accompanying balance sheets include: (i) refundable maintenance payments billed to lessees, which are paid out as related maintenance is performed or at the end of the lease, (ii) for lessees that pay non-refundable maintenance reserves, estimated maintenance costs accrued at the time a reimbursement claim or sufficient information is received regarding maintenance work performed, and (iii) maintenance for work performed for off-lease aircraft, which is not related to the release of reserves received from lessees.

Refundable maintenance reserves received by the Company are accounted for as a liability, which is reduced when maintenance work is performed during the lease and reimbursement to the lessee is paid. Such reserves are refunded after all return conditions and, in some cases, any other payments due under the lease are satisfied. Any refundable reserves retained by the Company to satisfy return conditions are recorded as revenue when the asset is returned.

AeroCentury Corp.
Notes to Financial Statements
December 31, 2013

3. Maintenance Reserves and Accrued Maintenance Costs (continued)

AeroCentury Corp.
Notes to Financial Statements
December 31, 2013

3. Maintenance Reserves and Accrued Maintenance Costs (continued)

Non-refundable maintenance reserves are recorded as maintenance reserves revenue (assuming cash is received or collections are reasonably assured). The timing difference between recording maintenance reserves revenue as usage occurs and recording maintenance expense as maintenance is performed can have material effects on the volatility of reported earnings.

At December 31, 2013 and December 31, 2012, the liability for maintenance reserves and accrued maintenance costs consisted of refundable maintenance payments billed to lessees based on usage and accrued maintenance costs for both off-lease aircraft and lessee maintenance claims for non-refundable maintenance reserves. Refundable maintenance reserves at December 31, 2012 also included a \$6,528,500 payment received from a lessee when its two aircraft leases were assigned to a new lessee upon the sale by the original lessee of all of its assets to the new lessee in 2012. In the first quarter of 2013, the two subject aircraft were returned to the Company by the new lessee in connection with the new lessee's bankruptcy and the \$6,528,500 payment was recorded as maintenance reserves revenue. At December 31, 2013 and December 31, 2012, the Company's maintenance reserves and accrued maintenance costs consisted of the following:

	December 31, 2013	December 31, 2012
Refundable maintenance reserves	\$ 10,480,000	\$ 14,477,400
Accrued maintenance costs	2,774,100	878,700
	<u>\$ 13,254,100</u>	<u>\$ 15,356,100</u>

Additions to and deductions from the Company's accrued maintenance costs during the years ended December 31, 2013 and 2012 for aircraft maintenance were as follows:

	For the Years Ended December 31,	
	2013	2012
Balance, beginning of period	\$ 878,700	\$ 1,013,400
Additions:		
Charged to expense	8,765,000	4,082,100
Capital equipment	482,900	52,200
Accrued claims related to refundable maintenance reserves	745,600	763,900
Prepaid maintenance and other	1,114,000	239,700
Total additions	<u>11,107,500</u>	<u>5,137,900</u>
Deductions:		
Payments	8,297,700	4,614,900
Other	914,400	657,700
Total deductions	<u>9,212,100</u>	<u>5,272,600</u>
Net increase/(decrease) in accrued maintenance costs	<u>1,895,400</u>	<u>(134,700)</u>
Balance, end of period	<u>\$ 2,774,100</u>	<u>\$ 878,700</u>

4. Operating Segments

The Company operates in one business segment, the leasing of regional aircraft to foreign and domestic regional airlines, and therefore does not

AeroCentury Corp.
Notes to Financial Statements
December 31, 2013

4. Operating Segments

The Company operates in one business segment, the leasing of regional aircraft to foreign and domestic regional airlines, and therefore does not present separate segment information for lines of business.

Approximately 0% and 4% of the Company's operating lease revenue was derived from lessees domiciled in the United States during 2013 and 2012, respectively. All revenues relating to aircraft leased and operated internationally are denominated and payable in U.S. dollars.

The tables below set forth geographic information about the Company's operating lease revenue for leased aircraft and aircraft equipment, grouped by domicile of the lessee:

Operating Lease Revenue	For the Years Ended December 31,	
	2013	2012
Africa	\$ 5,454,700	\$ 4,401,600
Asia	4,149,000	4,143,100
Caribbean	3,600,000	5,402,400
Europe and United Kingdom	3,415,500	6,366,500
North America	1,542,000	2,707,100
South America	633,000	641,600
	<u>\$ 18,794,200</u>	<u>\$ 23,662,300</u>

Net Book Value of Aircraft and Aircraft Engines Held for Lease	December 31,	
	2013	2012
Off lease	\$ 34,446,300	\$ 20,359,600
Asia	30,489,400	27,577,900
Africa	29,951,800	32,962,100
Europe and United Kingdom	20,384,700	25,012,300
North America	17,779,000	7,386,800
Caribbean	13,209,300	27,145,800
South America	6,114,700	3,223,200
	<u>\$ 152,375,200</u>	<u>\$ 143,667,700</u>

5. Concentration of Credit Risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash deposits and receivables. The Company places its deposits with financial institutions and other creditworthy issuers and limits the amount of credit exposure to any one party.

For the year ended December 31, 2013 the Company had four significant customers, which accounted for 23%, 19%, 11% and 10%, respectively, of lease revenue. For the year ended December 31, 2012 the Company had four significant customers, which accounted for 15%, 13%, 11% and 10%, respectively, of lease revenue.

AeroCentury Corp.
Notes to Financial Statements
December 31, 2013

5. Concentration of Credit Risk (continued)

At December 31, 2013, the Company had receivables from two customers totaling \$1,231,500, representing 40% of the Company's total receivables. Of that amount, \$984,000 was paid in early 2014.

At December 31, 2012, the Company had a receivable from one lessee of \$3,300,000, representing 71% of the Company's total receivables. Of that amount, \$180,000 was paid in early 2013. At December 31, 2012, the Company had an allowance for doubtful accounts totaling \$2,419,400 related to this customer for the amount owed in excess of the security deposits held by the Company. The customer was declared bankrupt during 2013 and the Company wrote off all receivables due from that customer in 2013, net of security deposits and refundable reserves held by the Company.

As of December 31, 2013, minimum future lease revenue payments receivable under noncancelable leases were as follows:

Years ending	Operating leases	Finance leases
2014	\$ 17,648,900	\$ 238,900
2015	10,932,800	182,400
2016	9,508,400	182,400
2017	5,927,000	171,900
2018	2,552,800	32,500
Thereafter	12,570,800	-
	<u>\$ 59,140,700</u>	<u>\$ 808,100</u>

Minimum lease payments due under the Company's finance lease include interest income totaling \$300,100.

6. Notes Payable and Accrued Interest

At December 31, 2013 and December 31, 2012, the Company's notes payable and accrued interest consisted of the following:

	December 31, 2013	December 31, 2012
Credit Facility principal	\$ 77,500,000	\$ 67,800,000
Credit Facility accrued interest	27,300	65,700
	<u>\$ 77,527,300</u>	<u>\$ 67,865,700</u>

In March 2013, the Company's Credit Facility (the "Credit Facility") provided by a syndicate of banks was increased from \$90 million to \$130 million and the maturity date was extended to September 30, 2015. The Credit Facility is secured by all of the assets of the Company, including its aircraft and engine portfolio.

The Company borrowed \$19,000,000 and \$19,900,000 during 2013 and 2012, respectively, under the Credit Facility. The Company repaid \$9,300,000 and \$17,300,000 of its Credit Facility debt during 2013 and 2012, respectively.

AeroCentury Corp.
Notes to Financial Statements
December 31, 2013

6. Notes Payable and Accrued Interest (continued)

In November 2013, the Company obtained a waiver of compliance with a customer concentration covenant under its Credit Facility agreement at the September 30, 2013 and December 31, 2013 calculation dates. The higher than anticipated concentration resulted in part from the Company recognizing operating lease revenues from certain lessees on a cash basis, as collectability was not reasonably assured. The Company was in compliance with all other covenants under the Credit Facility agreement at December 31, 2013, and was in compliance with all covenants at December 31, 2012.

The unused amount of the Credit Facility was \$52,500,000 and \$22,200,000 as of December 31, 2013 and December 31, 2012, respectively; however, the amount available at December 31, 2012 was limited to \$1,100,000 due to borrowing base limitations. There were no such limitations at December 31, 2013.

The weighted average interest rate on the Credit Facility was 3.94% and 4.00% at December 31, 2013 and December 31, 2012, respectively.

7. Stockholder Rights Plan

In December 2009, the Company's Board of Directors adopted a stockholder rights plan granting a dividend of one stock purchase right for each share of the Company's common stock outstanding as of December 18, 2009 and the Company entered into a rights agreement dated December 1, 2009 in connection therewith. The rights become exercisable only upon the occurrence of certain events specified in the rights agreement, including the acquisition of 15% of the Company's outstanding common stock by a person or group in certain circumstances. Each right allows the holder, other than an "acquiring person," to purchase one one-hundredth of a share (a unit) of Series A Preferred Stock at an initial purchase price of \$97.00 under circumstances described in the rights agreement. The purchase price, the number of units of preferred stock and the type of securities issuable upon exercise of the rights are subject to adjustment. The rights expire at the close of business December 1, 2019 unless earlier redeemed or exchanged. Until a right is exercised, the holder thereof, as such, has no rights as a stockholder of the Company, including the right to vote or to receive dividends.

8. Income Taxes

The items comprising the income tax provision are as follows:

	For the Years Ended December	
	2013	2012
Current tax provision:		
Federal	\$ -	\$ 1,000
State	800	800
Foreign	7,100	371,100
Current tax provision	7,900	372,900
Deferred tax provision:		
Federal	1,838,000	2,310,100
State	1,100	14,700
Decrease in valuation allowance	(158,600)	-
Deferred tax provision	1,680,500	2,324,800
Total income tax provision	\$ 1,688,400	\$ 2,697,700

AeroCentury Corp.
Notes to Financial Statements
December 31, 2013

8. Income Taxes (continued)

Total income tax expense differs from the amount that would be provided by applying the statutory federal income tax rate to pretax earnings as illustrated below:

	For the Years Ended December 31,	
	2013	2012
Income tax provision at statutory federal income tax rate	\$ 1,668,100	\$ 2,681,500
State tax provision, net of federal benefit	19,400	33,200
Prior year withholding tax adjustment	174,600	-
Decrease in valuation allowance	(158,600)	-
Other	(15,100)	(17,000)
Total income tax provision	\$ 1,688,400	\$ 2,697,700

Temporary differences and carry-forwards that give rise to a significant portion of deferred tax assets and liabilities as of December 31, 2013 and 2012 were as follows:

	December 31,	
	2013	2012
Deferred tax assets:		
Net operating loss carryovers	\$ -	\$ 932,000
Foreign tax credit carryover	1,198,100	1,830,000
Unearned revenue	103,800	-
Alternative minimum tax credit	100,800	100,800
Bad debt allowance and other	490,100	936,500
Deferred tax assets	1,892,800	3,799,300
Deferred tax liabilities:		
Accumulated depreciation on aircraft and aircraft engines	(17,343,000)	(17,471,100)
Minimum lease payments receivable	(649,500)	(533,200)
Deferred income	-	(55,600)
Net deferred tax liabilities before valuation allowance	(16,099,700)	(14,260,600)
Valuation allowance	-	(158,600)
Net deferred tax liabilities	\$ (16,099,700)	\$ (14,419,200)

The foreign tax credit carryover will be available to offset federal tax expense in future years. The foreign tax credit carryover expires beginning in 2016 and extends through 2022. The alternative minimum tax credit will be available to offset federal tax expense in excess of the alternative minimum tax in future years and does not expire.

A significant portion of recognized deferred tax assets relate to foreign tax credit carryovers. The valuation allowance deemed necessary at December 31, 2012 for certain foreign tax credits was reversed in the year ended December 31, 2013. The Company determined that, based on an assessment of all available evidence, it is more likely than not that future taxable income will be sufficient to realize the tax benefits of all the deferred tax assets on the balance sheets at December 31, 2013 and December 31, 2012.

AeroCentury Corp.
Notes to Financial Statements
December 31, 2013

8. Income Taxes (continued)

At December 31, 2013 and December 31, 2012, the Company had no material uncertain tax positions.

The Company accounts for interest related to uncertain tax positions as interest expense, and for income tax penalties as tax expense.

All of the Company's tax years remain open to examination other than as barred in the various jurisdictions by statutes of limitation.

9. Computation of Earnings Per Share

Basic and diluted earnings per share are calculated as follows:

	For the Years Ended December 31,	
	2013	2012
Net income	\$ 3,217,500	\$ 5,189,000
Weighted average shares outstanding for the period	1,543,257	1,543,257
Dilutive effect of warrants	43,779	19,797
Weighted average diluted shares used in calculation of diluted earnings per share	1,587,036	1,563,054
Basic earnings per share	\$ 2.08	\$ 3.36
Diluted earnings per share	\$ 2.03	\$ 3.32

Basic earnings per common share is computed using net income and the weighted average number of common shares outstanding during the period. Diluted earnings per common share are computed using net income and the weighted average number of common shares outstanding, assuming dilution. Weighted average common shares outstanding, assuming dilution, include potentially dilutive common shares outstanding during the period. Potentially dilutive common shares include the assumed exercise of warrants using the treasury stock method.

10. Related Party Transactions

The Company's portfolio of leased aircraft assets is managed and administered under the terms of a management agreement with JetFleet Management Corp. ("JMC"), which is an integrated aircraft management, marketing and financing business and a subsidiary of JetFleet Holding Corp. ("JHC"). Certain officers of the Company are also officers of JHC and JMC and hold significant ownership positions in both JHC and the Company.

Under the management agreement, JMC receives a monthly management fee based on the net asset value of the assets under management. JMC also receives an acquisition fee for locating assets for the Company. Acquisition fees are included in the cost basis of the asset purchased. JMC may receive a remarketing fee in connection with the re-lease or sale of the Company's assets. Remarketing fees are amortized over the applicable lease term or included in the gain or loss on sale recognized upon sale of the applicable asset.

10. Related Party Transactions (continued)

AeroCentury Corp.
Notes to Financial Statements
December 31, 2013

10. Related Party Transactions (continued)

Fees incurred during 2013 and 2012 were as follows:

	For the Years Ended December 31,	
	2013	2012
Management fees	\$ 4,352,400	\$ 4,166,200
Acquisition fees	799,000	1,066,000
Remarketing fees	589,300	259,000

In August 2009, the Company entered into an agreement (the "Assignment Agreement") with Lee G. Beaumont in which Mr. Beaumont assigned to the Company his rights to purchase certain aircraft engines from an unrelated third party seller. In January 2012, Mr. Beaumont became a "related person" with respect to the Company due to his open market acquisitions of shares representing over 5% of the Company's common stock. Mr. Beaumont received the third and final installment of \$66,700 due under the Assignment Agreement from the Company in the third quarter of 2012. During 2013, Mr. Beaumont also received certain fees from JMC in connection with placement of the engines with new or renewing lessees.

11. Warrants

As part of a previous subordinated debt financing, which was fully repaid in December 2011, the Company issued warrants to purchase up to 81,224 shares of the Company's common stock that are currently exercisable (and expire on December 31, 2015) and represent approximately 5% of the post-exercise fully diluted capitalization of the Company. The exercise price of the warrants is \$8.75 per share.

12. Subsequent Events

During January 2014, the Company purchased three Bombardier CRJ-700 aircraft on lease to a customer in the United States.

In March 2014, the Company sold a Fokker 50 aircraft and recorded a gain of approximately \$102,000.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

CEO and CFO Certifications. Attached as exhibits to this Annual Report on Form 10-K (the "Report") are certifications of the Company's Chief Executive Officer (the "CEO") and the Company's Chief Financial Officer (the "CFO"), which are required pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 (the "Section 302 Certifications"). This section of the Report includes information concerning the evaluation of disclosure controls and procedures referred to in the Section 302 Certifications and this should be read in conjunction with the Section 302 Certifications for a more complete understanding of the topics presented.

Evaluation of the Company's Disclosure Controls and Procedures. Disclosure controls and procedures ("Disclosure Controls") are controls and other procedures that are designed to ensure that information required to be disclosed in the Company's reports filed under the Securities Exchange Act of 1934 (the "Exchange Act"), such as this Report, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission ("SEC") and that such information is accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

CEO and CFO Certifications. Attached as exhibits to this Annual Report on Form 10-K (the “Report”) are certifications of the Company’s Chief Executive Officer (the “CEO”) and the Company’s Chief Financial Officer (the “CFO”), which are required pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 (the “Section 302 Certifications”). This section of the Report includes information concerning the evaluation of disclosure controls and procedures referred to in the Section 302 Certifications and this should be read in conjunction with the Section 302 Certifications for a more complete understanding of the topics presented.

Evaluation of the Company’s Disclosure Controls and Procedures. Disclosure controls and procedures (“Disclosure Controls”) are controls and other procedures that are designed to ensure that information required to be disclosed in the Company’s reports filed under the Securities Exchange Act of 1934 (the “Exchange Act”), such as this Report, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission (“SEC”) and that such information is accumulated and communicated to the Company’s management, including the CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

The Company’s management, with the participation of the CEO and CFO, evaluated the effectiveness of the design and operation of the Company’s Disclosure Controls and concluded that the Company’s Disclosure Controls were effective as of December 31, 2013.

Management’s Annual Report on the Company’s Internal Control Over Financial Reporting. Internal control over financial reporting (“Internal Control”) is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes policies and procedures that (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company’s assets that could have a material effect on the financial statements. The Company’s management is responsible for establishing and maintaining adequate Internal Control. Management evaluated the Company’s Internal Control based on the framework set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control – Integrated Framework (1992)* and concluded that the Company’s Internal Control was effective as of December 31, 2013. This report does not include an attestation report on Internal Control by the Company’s independent registered public accounting firm since the Company is a smaller reporting company under the rules of the SEC.

Changes in Internal Control Over Financial Reporting. No change in Internal Control occurred during the fiscal quarter ended December 31, 2013 that has materially affected, or is reasonably likely to materially affect, the Company’s Internal Control.

Item 9B. Other Information.

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

The information required by this item is included under (i) “Proposal 1: Election of Directors” as it relates to members of the Company’s Board of Directors, including the Company’s Audit Committee and the Company’s Audit Committee financial experts, any changes to procedures by which security holders may recommend nominees to the Company’s Board of Directors, (ii) “Information Regarding the Company’s Directors and Officers” as it relates to the Company’s executive officers, and (iii) “Section 16(a) Beneficial Ownership Reporting Compliance” as it relates to information concerning Section 16(a) beneficial ownership reporting compliance, in the Company’s definitive proxy statement (“Proxy Statement”), to be filed in connection with the Company’s 2014 Annual Meeting of Stockholders, and is incorporated herein by reference.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

The information required by this item is included under (i) “Proposal 1: Election of Directors” as it relates to members of the Company’s Board of Directors, including the Company’s Audit Committee and the Company’s Audit Committee financial experts, any changes to procedures by which security holders may recommend nominees to the Company’s Board of Directors, (ii) “Information Regarding the Company’s Directors and Officers” as it relates to the Company’s executive officers, and (iii) “Section 16(a) Beneficial Ownership Reporting Compliance” as it relates to information concerning Section 16(a) beneficial ownership reporting compliance, in the Company’s definitive proxy statement (“Proxy Statement”), to be filed in connection with the Company’s 2014 Annual Meeting of Stockholders, and is incorporated herein by reference.

The Company has adopted a code of business conduct and ethics, or code of conduct. The code of conduct qualifies as a “code of ethics” within the meaning of Section 406 of the Sarbanes-Oxley Act of 2002 and the rules promulgated thereunder. A copy of the code of conduct is available on the Company’s website at <http://www.aerocentury.com> or upon written request to the Investor Relations Department, 1440 Chapin Avenue, Suite 310, Burlingame, California 94010. To the extent required by law, any amendments to, or waivers from, any provision of the code will be promptly disclosed publicly. To the extent permitted by such requirements, the Company intends to make such public disclosure on its website in accordance with SEC rules.

Item 11. Executive Compensation.

Incorporated by reference to the section of the Proxy Statement entitled “Information Regarding the Company’s Directors and Officers — Employee Compensation.”

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Incorporated by reference to the section of the Proxy Statement entitled “Security Ownership of Certain Beneficial Owners and Management.”

Item 13. Certain Relationships and Related Transactions, and Director Independence.

Incorporated by reference to the section of the Proxy Statement entitled “Related Party Transactions.”

Item 14. Principal Accountant Fees and Services.

Incorporated by reference to the section of the Proxy Statement entitled “Information Regarding Auditors – Audit Fees.”

PART IV

Item 15. Exhibits.
